State Superintendent's Advisory Council

The State Superintendent's Advisory Council is composed of the following nine Division Superintendents who represent the regions as indicated:

Region No. 1: Chairman, Andrew G. Wright, Superintendent of Greenville County Public Schools, Emporia 23847.

Amelia Co.	Goochland Co.	Nottoway Co.
Brunswick Co.	Greenville Co.	Petersburg City
Chesterfield Co.	Hanover Co.	Powhatan Co.
Colonial Heights City	Henrico Co.	Prince Edward Co.
Cumberland Co.	Lunenburg Co.	Richmond City
Dinwiddie Co.	Mecklenburg Co.	Southampton Co.
		Sussex Co.

Region No. 2: Chairman, C. Alton Lindsay, Superintendent of Hampton City Public Schools, Hampton 23369.

Accomack Co.	James City Co.	Prince George Co.
Charles City Co.	Nansemond Co.	Suffolk City
Chesapeake City	New Kent Co.	Surry Co.
Franklin City	Newport News City	Virginia Beach City
Hampton City	Norfolk City	Williamsburg City
Hopewell City	Northampton Co.	York Co.
Isle of Wight Co.	Portsmouth City	

Region No. 3: Chairman, Eldon W. Christopher, Superintendent of Essex-Middlesex County Public Schools, Tappahannock 22560.

Caroline Co.	King George Co.	Northumberland Co.
Essex Co.	King William Co.	Richmond Co.
Fredericksburg City	Lancaster Co.	Spotsylvania Co.
Gloucester Co.	Mathews Co.	Stafford Co.
King and Queen Co.	Middlesex Co.	Westmoreland Co.

Region No. 4: Chairman, O. A. Norton, Superintendent of Rappahannock-Warren County Public Schools, Front Royal 22630.

Alexandria City	Falls Church City	Prince William Co.
Arlington Co.	Fauquier Co.	Rappahannock Co.
Clarke Co.	Frederick Co.	Shenandoah Co.
Culpeper Co.	Loudoun Co.	Warren Co.
Fairfax Co.	Page Co.	Winchester City
Fairfax City		

Region No. 5: Chairman, William Wetsel, Superintendent of Greene-Madison County Public Schools, Stanardsville 22973.

Albemarle Co.	Fluvanna Co.	Madison Co.
Buckingham Co.	Greene Co.	Nelson Co.
Charlottesville City	Louisa Co.	Orange Co.

Region No. 6: Chairman, F. B. Glenn, Superintendent of Waynesboro City Public Schools, 301 Pine Avenue, Waynesboro 22980.

Alleghany Co.	Clifton Forge City	Rockingham Co.
Augusta Co.	Harrisonburg City	Covington City
Bath Co.	Highland Co.	Staunton City
Buena Vista City	Rockbridge Co.	Waynesboro City
		Lexington City

Region No. 7: Chairman, O. T. Bonner, Superintendent of Danville City Public Schools, Danville 24541.

Amherst Co.	Campbell Co.	Halifax Co.
Appomattox Co.	Charlotte Co.	Lynchburg City
Bedford Co.	Danville City	Pittsylvania Co.

Region No. 8: Chairman, R. P. Reynolds, Superintendent of Carroll County Public Schools, Hillsville 24343.

Bland Co.	Giles Co.	Radford City
Botetourt Co.	Henry Co.	Roanoke Co.
Carroll Co.	Martinsville City	Roanoke City
Craig Co.	Montgomery Co.	Wythe Co.
Floyd Co.	Patrick Co.	
Franklin Co.	Pulaski Co.	

Region No. 9: Chairman, J. Leonard Mauck, Superintendent of Smyth County Public Schools, Marion 24354.

Bristol City	Lee Co.	Tazewell Co.
Buchanan Co.	Norton City	Washington Co.
Dickenson Co.	Russell Co.	Wise Co.
Galax City	Scott Co.	
Grayson Co.	Smyth Co.	

President of the State Board of Education, Lewis F. Powell, Jr. (Ex officio)

Ninety-Eighth Annual Report of the Superintendent of Public Instruction, 1967-68

INTRODUCTION

During the year ending June 30, 1968, 1,053,358 pupils were enrolled in public schools in Virginia; 48,500 classroom teachers and supervisory personnel were employed to provide an instructional program for these students. The average salary for all instructional personnel was \$6,936 and for classroom teachers it was \$6,720, compared with \$6,342 and \$6,145, respectively, during 1966-67.

Total expenditures for operation, capital outlay, and debt service for public elementary and high schools and for vocational-technical schools were more than \$700,000,000—an increase of approximately \$89,000,000 above the previous year.

Continued improvement was noted during the year in many phases of public education. The ratio of elementary pupils to classroom teachers was further reduced. The cost of operation per pupil in average daily attendance increased from \$492 in 1966-67 to \$548 in 1967-68. Increases also were noted in the number of students who continued their formal education, in the number of schools which offered summer courses, in the number of teachers holding certificates based on college degrees, and in the holding power of the schools.

APPROPRIATIONS AND LEGISLATION APPROVED BY THE 1968 GENERAL ASSEMBLY

The 1968 General Assembly continued its forward thrust for the improvement of public education in Virginia. Appropriations from general and special funds for the 1968-70 biennium amounted to \$783,059,655—an increase of \$226,530,085 over the sum allotted for the 1966-68 biennium. The appropriation from the State's General Fund totaled \$677,021,135, as compared with \$511,461,345 for 1966-68, an increase of \$165,559,790 (32.37 percent). The General Fund revenue includes \$126,648,800 in estimated proceeds from the State sales tax returnable to localities on the basis of school population.

As a result of other legislative action:

- The State minimum salary scale for degree teachers was upgraded \$300 for each year of the biennium.

- A \$500 additional allowance was continued for persons holding the master's degree.

- The allowance per pupil in average daily attendance was increased from \$100 to \$110 the first year of the biennium and to \$115 the second year for other public school operating costs.

- The sum of \$15,000,000 was allotted for reimbursement to localities operating kindergartens as part of their regular school programs during the biennium.

- The basic salary of division superintendents was increased \$300 for each year of the biennium. The State bears 60 percent of the increase and the localities 40 percent.

- A compulsory school attendance law was adopted to replace local option legislation which had been in effect since 1959.

- Increased funds were provided to permit State reimbursement for 200 additional positions in special education and 100 additional guidance counselors. Reimbursement is based on 60 percent of the State minimum salary scale.

- Additional funds were appropriated for in-service training programs for teachers and for 850 additional teacher scholarships during the biennium.

- The appropriation for summer schools was increased to provide for an expanded program.

- The appropriation to assist localities using educational television was increased from \$1,000,000 to \$2,000,000.

- Provisions also were made for special education programs for hearing-impaired and aphasic children.

At the request of the State Board of Education, legislative committees are engaged in two major studies proposed by the Committee on Raising the Level of Public Education—the problem of school consolidation and the formula for the distribution of the Basic School Aid Fund.

REVISED STANDARDS FOR TEACHER CERTIFICATION

Revised standards for the certification of public school teachers in Virginia, adopted by the State Board of Education in 1966, became effective July 1, 1968. The new requirements reflect the first major revisions in teacher certification regulations since 1960. Some of the major changes are:

- The Collegiate Professional Certificate is issued initially for a period of five years from the date of qualification and is renewable for five years. (Requirements for the Graduate Professional Certificate are unchanged.)

- General education requirements were revised to provide that all applicants must possess a baccalaureate degree with a background of 48 semester hours in general education, including at least 12 semester hours of courses in the humanities, 12 hours of social science, 12 hours of laboratory science and mathematics, and four hours of health and physical education. The remaining eight hours must be from the humanities, social sciences, and laboratory science and mathematics. (The revised regulations also recommend that all teachers take a course in speech and in basic economics to satisfy in part the general education requirements.)

- Not less than 120 clock hours of student teaching are required, with a minimum of at least 90 clock hours given to actual teaching.

- For an endorsement in elementary education, grades 1-7, the applicant must complete a total of 60 semester hours in specific subjects, including a required course in American history and a course in basic economics.

- The revised regulations increase the number of semester hours required for endorsement in art, distributive education, driver education, English, English and speech, English and journalism, English and dramatics, foreign languages, health and physical education, history and social science, mathematics, music, science, and special education. Applicants for endorsement in history, geography, or sociology are required to complete a course in basic economics.

- A new Industrial Education Certificate, based in part on college credit courses, is available to qualified applicants in vocational industrial education.

ACCREDITATION STUDIES FOR ELEMENTARY AND SECONDARY SCHOOLS

A study to develop standards for accrediting elementary schools, which began in the spring of 1967, was continued during 1968. A sound system for accrediting elementary schools is one of the most important developments in the history of elementary education in Virginia.

The accreditation study is being made by a committee composed of public, private, and parochial school representatives and college

professors. The study, which is a major step in efforts to upgrade the quality of public education in Virginia, is focusing attention on standards governing staffing, pupil-teacher ratio, plant facilities, libraries and other instructional aids, organization, and administration.

A 17-member committee of educators was appointed in December 1966 to revise and strengthen accreditation standards for secondary schools. The standards for junior and senior high schools were last revised in 1960.

KINDERGARTEN EDUCATION

For the first time in Virginia's history State funds totaling \$15,000,000 were made available by the General Assembly to assist localities operating kindergarten programs as a part of their regular school systems during 1968-70.

The State Board of Education, which proposed State aid for kindergartens in its budget requests for the biennium, adopted regulations governing the length of the school day, classroom size, and teacher endorsement for kindergartens.

A guide for kindergarten programs was prepared by a Committee on Kindergarten Education and was distributed to public schools and colleges throughout the State.

The guide was designed to further the development of appropriate learning experiences for five-year-old children. It also gives directions to teachers, supervisors, and administrators for content and procedures in the kindergarten curriculum and recommends facilities, materials, and equipment for the kindergarten program.

SYSTEMWIDE EVALUATION AND PLANNING

The Committee on Raising the Level of Public Education in Virginia recommended that the State Department of Education increase its efforts to work with division superintendents, school board members, and members of governing bodies in localities having major educational needs and assist them in formulating plans for effecting substantial improvements.

Following this recommendation the Superintendent of Public Instruction recommended and the State Board of Education approved the establishment of the position of Special Assistant for Evaluation and Planning, effective July 1, 1968. The Special Assistant and his staff will work cooperatively with selected school divisions in developing long-range planning programs to meet educational needs.

The Evaluation and Planning Program will involve systemwide studies of selected school divisions. These studies will cover community

background, educational programs, staff and in-service education, teaching aids and materials, school plants, and transportation and will involve the participation of the staff of the local school division, the Department of Education, college personnel, and consultants as needed. "An Evaluation Instrument for Public Schools in Virginia" was developed by the Department to serve as a guide in making these studies.

The reports prepared for each division will evaluate the present program and provide a basis for projecting substantial improvements.

STRENGTHENING THE STATE DEPARTMENT OF EDUCATION

The rising expectations of public education, the growth of the State Department of Education's program in response to educational needs and increasing requests of school divisions for leadership services, and the efficient coordination of the services of the staff—all have their impact on the Department's Central Office.

In light of the demands upon the Central Office, its staff was reorganized in the summer of 1967. To relieve the State superintendent of numerous administrative responsibilities and to enable him to devote more time to major needs and problems of the public school system, the State Board established new positions of deputy superintendent of public instruction (formerly assistant superintendent), assistant superintendent for administration and finance, and assistant superintendent for instruction. The position of administrative assistant and director of finance was eliminated. Two other new positions were created—finance director, and special assistant for evaluation and planning.

Developments in certain important areas of public education in Virginia during the past 10 years are reflected in the statistical data given on the following page.

COMPARATIVE DATA ON PUBLIC EDUCATION IN VIRGINIA 1958-59—1967-68

	1958-59	1967-68
School Enrollment.....	821,929	1,053,358
Percent of increase over 1958-59.....		28.2
Eighth-grade enrollment expressed as a percent of the first grade eight years earlier.....	77.9	93.9
Twelfth-grade enrollment expressed as a percent of the first grade 12 years earlier.....	36.5	63.8
Graduates in 1967-68 expressed as a percent of ninth-graders in fall 1964.....		75.4
Graduates expressed as a percent of the first grade 12 years earlier.....	34	61
Number of high school graduates.....	26,542	50,942
Percent of increase over 1958-59.....		91.9
Percent of high school graduates entering college.....	35.9	51.5
Percent of high school graduates entering business, trade, or nursing schools.....	9.9	10.7
Students transported in public school buses (average daily).....	411,104	534,114
Instructional personnel.....	32,335	48,500
Percent of increase over 1958-59.....		50
Ratio of pupils to all classroom teaching positions:		
Elementary.....	32.6—1	26.2—1
High School.....	24.6—1	19.6—1
Guidance counselors devoting at least half of their time per day to guidance in public high schools.....	304 (including 185 full time)	1,117 (including 811 full time)
Average salary of classroom teachers.....	\$3,956	\$6,720
Percent of increase over 1958-59.....		69.9
Average salary of all instructional personnel....	4,058	\$6,936
Percent of increase over 1958-59.....		70.9
Estimated value of school property.....	\$ 653,235,729	\$1,339,979,572
State appropriations for public education.....	76,104,823	273,671,345
Total expenditure for public education.....	\$ 254,995,804*	\$ 704,074,925*
Cost of operation per pupil in average daily attendance.....	\$243	\$548

*Operation, Capital Outlay, and Debt Service.

DIVISION OF ELEMENTARY AND SPECIAL EDUCATION

ELEMENTARY EDUCATION

Purpose and Scope

The major function of the Elementary Education Service is to provide leadership for the improvement of elementary education in Virginia in keeping with the law and established policies of the State Board of Education. A related function is that of assisting in improving the services of supervisory personnel and elementary school principals. Elementary Education Service personnel continually study all phases of elementary education in the State, help determine progress made in school divisions, identify problems in elementary education, and provide leadership and assistance in the development of the elementary school curriculum and in the preparation of curriculum materials for local school use.

The Elementary Education Service staff serves, directly or indirectly, all school personnel concerned with elementary education. In 1967-68 these included 117 elementary supervisors, 49 general supervisors, and 76 directors of instruction employed with State aid in 81 counties and 25 cities; 1,326 principals of elementary schools, 96 principals in combined elementary and junior high schools, 136 principals in combined elementary and high schools; and 27,022* classroom teachers in schools enrolling 687,397† pupils.

Accomplishments

Conferences. A Statewide supervisory personnel conference was held to emphasize the improvement of instruction through the coordinated efforts of all school personnel. Major features of the conference included an address by an outstanding educator. Panel and group discussions focused on the supervisor as: coordinator for improvement of instruction, coordinator in planning, coordinator to implement plans, and coordinator in evaluating effects. The annual conference of elementary school principals emphasized the improvement of elementary schools through a system of accreditation. Tentative standards for accrediting elementary schools were reviewed by principals and recommendations for changes were made.

Members of the Elementary Education Service staff attended and participated in other conferences sponsored by the Virginia Education Association, the Southern Association of Colleges and Schools, the Association for Supervision and Curriculum Development, the National Science Teachers Association, the National Council for the Teachers of Mathematics, the Southern States Work Conference, the International Reading Association, and the Department of Elementary School Principals.

Curriculum Development. A curriculum guide entitled *Elementary School Economics—A Tentative Guide for Teachers* was used on an experimental basis by 9,000 elementary teachers during 1966-67. The Elementary Education Service staff and a committee of teachers and supervisors revised the guide from recommendations and suggestions made by teachers during the summer of 1967. Fifteen thousand copies of the revision, *Elementary School Economics—A Guide for Teachers*, were distributed and used by elementary teachers during the 1967-68 school year.

*Teachers for whom daily assignments were reported as of September 30, 1967 to Division of Educational Research.
†Fall enrollment reported as of September 30, 1967 to Division of Educational Research.

The Elementary Education Service staff, working with a committee of classroom teachers, supervisors, superintendents, and college representatives, developed *A Guide for Kindergarten Education*. The kindergarten guide was distributed to elementary principals, elementary supervisors, college and university personnel, and classroom teachers. A total of 8,000 copies were distributed early in 1968.

Accreditation of Elementary Schools. The State Superintendent of Public Instruction appointed an 18-member committee to develop standards, procedures, and policies for the accreditation of elementary schools by the State Board of Education. The committee held three two-day meetings to prepare standards in the areas of 1) personnel, 2) program, and 3) school plant and instructional equipment and materials. Tentative standards developed by the committee were presented to 600 elementary school principals for reaction. Division superintendents at the annual conference heard a report of the proposed standards and offered suggestions for improvement.

Field Work. Staff members worked in 64 counties and 24 cities and participated in local workshops and conferences, met with superintendents, principals, supervisors, and worked with Parent-Teacher Associations. Staff members made 36 visits to regional meetings of supervisors, and six visits to regional meetings of elementary school principals.

Staff. In providing leadership to elementary education, the Elementary Education Service has employed for the first time a specialist in elementary mathematics. It is anticipated that persons specializing in other content areas will be added to the staff as positions become available.

The Cooperative Program in Elementary Education of the Southern Association of Colleges and Schools. School systems in states served by the Southern Association of Colleges and Schools may participate in an elementary school improvement program by becoming members of the Cooperative Program in Elementary Education. Since 1960-61, two options have been available to members in the Cooperative Program: (1) affiliated membership with a continuous program of school improvement conducted in each individual school and (2) membership through accreditation. Affiliated membership of at least one year must precede application for membership through accreditation.

Virginia has a State Elementary Committee which is responsible for giving leadership in the State to the Southern Association's program of affiliation and accreditation of elementary schools. Members of the State Committee serve on the Association's Commission for Elementary Schools.

During the 1967-68 school year, 411 elementary schools held affiliated membership in the Cooperative Program in Elementary Education. Fifteen city school divisions and 10 county divisions held division-wide affiliated membership. Also participating in the program were seven individual public schools, six private, and six military reservation schools.

The Cooperative Program in Elementary Education has accredited 46 elementary schools since 1964. Forty-one of these have been in Fairfax County, three on the Quantico Marine Base, and two in York County. Elementary schools in the city of Richmond and in Fairfax and York counties were engaged in self studies and were visited by committees pursuant to accreditation by the Southern Association of Colleges and Schools.

Title III, National Defense Education Act. During 1967-68 staff members reviewed applications for the purchases of materials and equipment with funds available from Title III of the National Defense Education Act. The applications included:

<i>Subject</i>	<i>Number of Projects</i>	<i>Number of School Divisions</i>
Civics.....	15	14
English.....	84	48
Geography.....	100	59
History.....	92	53
Mathematics.....	101	64
Modern Foreign Languages.....	12	7
Reading.....	134	65
Science.....	174	86

Length of Employment of Non-Teaching Elementary School Principals. The number of non-teaching elementary school principals continues to increase. The following table shows the length of employment of non-teaching elementary school principals.

TABLE 1—NUMBER OF MONTHS OF EMPLOYMENT OF
NON-TEACHING ELEMENTARY SCHOOL PRINCIPALS

	Less Than 10 Months	10 Months	10½ Months	11 Months	12 Months	Totals
Non-teaching Elementary Principals:						
1966-67.....	11	158	6	200	632	1,007
1967-68.....	15	187	4	205	626	1,037

Size of Schools. The following table shows the size of elementary schools in terms of the number of classroom teachers and the enrollments for the years 1965-66, 1966-67, and 1967-68.

TABLE 2—CLASSROOM TEACHERS—PUPILS ENROLLED

CLASSROOM TEACHERS				PUPILS ENROLLED			
NUMBER OF TEACHERS	NUMBER OF SCHOOLS			NUMBER OF PUPILS	NUMBER OF SCHOOLS		
	1965-66	1966-67	1967-68		1965-66	1966-67	1967-68

Pupil Progress. As shown by the following table, the number and percent of pupils not making normal progress through the elementary grades has decreased, with the exception of the seven-year periods for the years 1953-54—1959-60, 1960-61—1966-67, and 1961-62—1967-68, when a slight increase was shown in the number and percent of children not making normal progress.

TABLE 3—PUPIL PROGRESS IN ELEMENTARY SCHOOL

SPECIAL EDUCATION SERVICE

Overview

The primary responsibility of the Special Education Service is to provide consultation, leadership, and direction to local school divisions in the initiation, expansion, and improvement of programs and services for exceptional children, and to disburse State special education funds in accordance with the rules and regulations established by the State Board of Education.

Exceptional children are defined as those who deviate from the norm either physically, emotionally and/or mentally to such an extent that they require a differentiated or specialized program in order for them to develop to their maximum potential.

During the school year 1967-68, 1,073 special education teachers were employed to serve 32,125 handicapped children in Virginia's public schools. This represents an increase of 197 teachers and 1,203 children when compared to the preceding year. Increased State, local, and Federal appropriations have made this growth possible. Enlarged teacher education programs and continuing improvement of diagnostic procedures and teaching programs will contribute to a refinement of services to these children. While Virginia's total program of special education has grown steadily, its services are not spread evenly over the State. Population density, geography, financial ability, and public concern vary

to such degree that some areas of the State provide sophisticated, comprehensive programs while other areas have no program. Based on national prevalence estimates, the handicapped children now being served represent approximately 33 percent of those in need of special education.

The following charts illustrate the growth in the various areas during the past five years. While the greatest expansion has been in classes for the mentally retarded, programs in other areas have also progressed.

NUMBER OF CLASSES AND TEACHERS

	1963-64	1964-65	1965-66	1966-67	1967-68
Mentally Retarded.....	396	445	542	691	810

Neurologically Impaired.....	5	7	10	15	21
Physically Handicapped.....	32	30	27	25	25
Speech.....	76	88	100	118	151
Hearing.....	8	8	8	9	21
*Hospital Teachers.....	28	27	27	29	30
*Visiting Teachers.....	128	135	137	185	208
*Homebound Teachers.....	1,033	1,201	1,265	1,181	1,214
*School Psychologists.....				30	47
Total.....	534	609	713	896	1,073

In addition to the hospital teachers, visiting teachers, homebound teachers, and school psychologists, 949 special class teachers were reimbursed from State special education funds for the school year 1967-68. This represents an increase of 150 State aid positions over the preceding year.

NUMBER OF CHILDREN SERVED

	1963-64	1964-65	1965-66	1966-67	1967-68

*Not included in total.

Description of Programs

Instruction for the Physically Handicapped. Children with crippling conditions are encouraged to attend regular classes whenever possible. Often this may be accomplished by slight modification of physical facilities. Some divisions have found it desirable, however, to operate schools especially designed and equipped for children with crippling conditions.

Homebound Instruction. This program is designed to meet the educational needs of children confined either temporarily or permanently to their homes because of illness, accident, or congenital deformity. During the past year, this program was expanded to include girls unable to attend school due to pregnancy.

Blind and Partially-Sighted Children. Through the utilization of federal funds and in cooperation with the Virginia Commission for the Visually Handicapped, 558 children were aided by the Special Education Service with apparatus, Braille, and/or large print books.

Children with Speech and Hearing Impairments. Special programs for children who have speech and/or hearing problems were developed in 33 school divisions served by 153 speech therapists and three supervisors of speech and hearing programs.

In 76 school divisions where hearing tests were administered by audiometric technicians, speech therapists, and other trained persons, 165,474 children were tested; 8,063 children were found to have significant hearing impairments; and 2,674 children received a medical follow-up for corrective purposes.

Emotionally Disturbed. These are children who, because of emotional or organic difficulties, are too distraught to adjust successfully to a regular classroom environment.

In addition to instruction provided in treatment centers and homes, 45 special classes were held for 415 children in Arlington, Fairfax, Chesterfield, Henrico, and Orange Counties and in the cities of Charlottesville, Lynchburg, Norfolk, Richmond, and Roanoke.

Neurologically Impaired. Twenty-one classes in eight school divisions provided services to children classified as being neurologically impaired. These are children who manifest severe learning problems usually accompanied by evidence of central nervous system impairment.

Children with Retarded Mental Development. This program continues to experience the greatest expansion in terms of classes and the number of children served. A total of 11,508 mentally retarded children were enrolled in 810 special classes in 55 counties and 32 cities throughout the State. The following statistics contrast the scope of the program in 1966-67 and 1967-68:

<i>Classification</i>	<i>Children</i>		<i>Classes</i>	
	<i>66-67</i>	<i>67-68</i>	<i>66-67</i>	<i>67-68</i>
Severely retarded (trainable).....	1,413	1,465	100	111
Moderately retarded (educable).....	9,057	10,043	591	699
	10,470	11,508	691	810

Instruction of Children in Hospitals. Thirty hospital teachers were paid from State funds to teach 1,999 children and youths in 14 hospitals, rehabilitation centers, and sanatoriums as follows:

<i>Hospitals</i>	<i>Number of Persons Taught</i>	<i>Number of Teachers</i>
Crippled Children's Hospital, Richmond.....	279	4
E. G. Williams Hospital, Richmond.....	23	1
Medical College of Virginia Hospital, Richmond.....	111	2
University of Virginia Hospital, Charlottesville.....	441	3
G. B. Johnston Memorial Hospital, Abingdon.....	126	1
DePaul Hospital, Norfolk.....	76	1
King's Daughters Hospital, Norfolk.....	113	1
Eastern State Hospital, Williamsburg (Children's Unit, Dunbar, for seriously emotionally disturbed).....	41	2
Children's Rehabilitation Center, University of Virginia, Charlottesville.....	101	2
National Orthopedic and Rehabilitation Hospital, Arlington..	24	1
Woodrow Wilson Rehabilitation Center, Fishersville.....	365	4
Roanoke Memorial Rehabilitation Center, Roanoke.....	66	1
<i>T. B. Sanatoriums</i>		
Blue Ridge, Charlottesville.....	83	3
Catawba, Catawba.....	150	4
	<hr/> 1,999	<hr/> 30

School Psychological Services. Reimbursement was made to localities for psychological evaluations on 2,051 children found eligible for placement in special education classes. In addition, localities received partial reimbursement on the salaries of 47 full-time school psychologists employed in 15 school divisions.

Visiting Teacher Services 1967-68

There were 208 persons employed as visiting teachers in 82 school divisions throughout the State during the past year. Reimbursement from State funds was made on 86 positions.

The following significant statistical information was taken from the annual reports submitted by visiting teachers to the Special Education Service:

REFERRALS TO VISITING TEACHERS

38,654 new referrals for the current year

12,054 referrals carried over from the previous year

<i>Reason for Referral</i>	<i>Boys</i>	<i>Girls</i>
Child-Centered Problem.....	6,275	3,740
Home-Centered Problem.....	6,729	5,477
School-Centered Problem.....	3,939	2,429
Attendance Problem.....	9,504	6,862
Health Problem.....	2,840	2,913
	Total—50,708	

An analysis of visiting teachers' annual reports indicates that the basic causes for referrals were the following:

<i>Basic Causes</i>	<i>Frequency</i>
Child-Centered Problem.....	11,396
Home-Centered Problem.....	17,789
School-Centered Problem.....	6,738
Attendance Problem.....	13,898
Health Problem.....	6,324
Total.....	56,145

Activities of Members of the Special Education Staff

One supervisor and four assistant supervisors in the Special Education Service rendered the following services during 1967-68:

They made an aggregate of 300 visits for conferences with school personnel and visits with other services for orientation conferences, for in-service education, for consultative services, and for evaluations. They participated in 65 State, local, and national conferences, as well as staff conferences and individual interviews.

The staff gave leadership to the establishment of 147 new programs in the State; administered the ESEA Title VI allocation which was used primarily for teacher training programs; determined eligibility and awarded fellowships and traineeships under funds provided by Public Law 85-926, as amended; and also conducted workshops and institutes for hospital teachers, speech therapists, visiting teachers, and teachers of emotionally disturbed children.

Special Education Service personnel also conducted, in cooperation with the Governor's Planning Office, two workshops for special education teachers on physical education for the mentally retarded; evaluated credentials of applicants for positions as school psychologists in various school divisions; evaluated applications for financial assistance for the education of handicapped children classified as multiple handicapped and/or aphasic; and disbursed State aid totaling \$3,572,805.06 to localities for services to exceptional children.

Evidence of growth in the State special education program is reflected by the above statistics. It is reasonable to anticipate a surge in new programs during the coming year as a result of increased State and Federal funds, the impact of teacher training programs conducted under ESEA Title VI, new State legislation affecting hearing-impaired children, and a greater sensitivity to the needs of exceptional children on the part of local school administrators and citizens.

THE VIRGINIA SCHOOL FOR THE DEAF AND THE BLIND, STAUNTON

The school completed its 129th session with commencement exercises in June 1968. Eleven students in the Department for the Deaf and six in the Department for the Blind were graduated with diplomas. Certificates were awarded to three deaf students who completed their terminal year. Four deaf graduates qualified for Gallaudet College, and two blind students have been accepted by colleges. Many of the students secured jobs shortly after graduation while others are continuing their education in business colleges and other vocational schools.

The dormitory for 96 older deaf girls was occupied in January 1968. This building also contains a dining room on the ground floor for older deaf students. The new dormitory for 64 young deaf boys will be occupied in the fall of 1968.

The Department for the Deaf has added the eleventh and twelfth grades. Every effort is being made to improve services in each department, and the school maintains an excellent national and state reputation. Attendance at workshops and conferences helps keep the staff informed on new developments in the field of education for deaf and blind children.

VIRGINIA SCHOOL AT HAMPTON

At the 1906 session of the General Assembly, legislation established the Virginia School at Hampton for the education of deaf and blind children. The educational objectives of the school include the development of self-realization, proper human relationships, economic self-sufficiency, and civic responsibility.

The school consists of two departments, the Department for the Deaf and the Department for the Blind, and vocational training is offered in both. The high school is accredited by the State Board of Education, and graduates of the two departments are eligible for advanced educational opportunities.

DIVISION OF SECONDARY EDUCATION

The Division of Secondary Education is responsible for providing leadership to the public schools of Virginia in the area of secondary education. The staff of the Division renders supervisory and administrative services to local school divisions and assists them in developing and maintaining quality education in Virginia's high schools. Personnel of the Division cooperate with other divisions in the Department, with institutions of higher learning, and with the localities to upgrade the educational program in Virginia.

Division personnel are primarily concerned with improving instruction in academic subjects, the fine arts, health and physical education, driver education, and adult education. To carry out these objectives, the work is divided among 10 different services: Adult Education; Art; Driver Education; English; Foreign Languages; Health and Physical Education, Safety and Recreation; History, Government, and Geography; Mathematics; Music; and Science. The Division also is responsible for supervising projects conducted under Title III of the National Defense Education Act (NDEA).

Staff members work with local school divisions to achieve specific objectives. These include: interpreting the policies of the State Board of Education; providing leadership in the development of the curriculum and the improvement of instruction; giving impetus to the continuous evaluation of secondary education; serving as a resource agency to assist in the study of specific local problems; providing consultative services; assisting in accreditation and licensing procedures; and working with professional personnel at every level of education in an effort to improve secondary education in Virginia.

Supervisors and their assistants in each service perform a number of important duties such as serving on evaluation committees, participating in State-wide conferences, arranging in-service opportunities for teachers, conducting surveys, addressing civic and educational groups, assisting in the development of library facilities, participating in regional and national efforts devoted to curriculum improvement, and conferring with representatives of school divisions throughout the State.

Reports were received during 1967-68 from 490 public high schools and 69 private high schools.

In addition to the overall activities performed by the Division staff to promote the improvement of secondary education, accomplishments during the year included the following:

SUPERVISORY AND ADMINISTRATIVE RESPONSIBILITIES

Accreditation of High Schools. Accreditation standards are designed to provide guidance for high schools in promoting better educational opportunities for youth. During the 1967-68 school year, 476 public secondary schools (schools containing one or more of grades eight through 12) and 69 private secondary schools were accredited by the State Board of Education. Data processing was used to analyze the Preliminary Annual High and Junior High School Reports of all schools offering studies on the high school level.

Staff members visited nine new public secondary schools and two new private secondary schools that filed Preliminary Annual High or Junior High School

Reports for the first time. Six previously accredited public secondary schools and one private secondary school were converted, consolidated, or discontinued for the 1967-68 school session.

The committee which was appointed by the Superintendent of Public Instruction to revise standards for accrediting secondary schools is in the final stages of its assignment. The proposed revisions will be ready for presentation to the Superintendent of Public Instruction early in 1968-69.

High Schools Closed, Consolidated, or Converted. During 1967-68 the following public high schools were closed, consolidated, or converted:

<i>Division</i>	<i>School</i>
Albemarle.....	Jackson P. Burley High School..... Closed
Albemarle.....	Scottsville High School..... Converted to Scottsville Junior High School
Bedford.....	Boonsboro High School..... Closed
York.....	James W. Johnson High School..... Converted to Yorktown Intermediate School
Chesapeake.....	Indian River Junior High School..... Converted to Indian River High School
Virginia Beach....	Kempsville Junior High School..... Converted to Kempsville High School
Private School....	Tallwood School..... Closed

State Aid for Employment of Supervising Principals for Twelve Months. Reimbursement totaling \$816,432 was distributed to 95 counties, 33 cities, and six towns where 1,044 principals of elementary and secondary schools were employed on a 12-month basis.

The program is designed to help school divisions improve the quality of administration, operation, and supervision of the schools. It is credited with improving the organization and planning of the school program, promoting better supervision of summer school activities, school-community relations, and services rendered by the schools to the students and communities.

Conferences. The State Department of Education sponsored conferences, workshops, and meetings during 1967-68 for the purpose of disseminating information and discussing developments in all fields of secondary education. Statewide conferences for teachers and supervisory personnel were conducted by the following services: Art; Foreign Languages; Health and Physical Education; History, Government, and Geography; Mathematics; Music; and Science.

The Annual Conference of Secondary School Principals, which is sponsored by the Division of Secondary Education, was held on June 17-19, 1968, in Roanoke. The conference theme, "Cooperation, Coordination, and Communication: Essentials for Today's Secondary Schools," served as a basis for exploring the many facets of the duties and responsibilities of the secondary school administrator.

The staff members of the Division of Secondary Education also participated in numerous pre-school conferences, meetings, and study groups which were sponsored by local school divisions or by district and regional groups.

Southern Association of Colleges and Schools. The primary function of the Southern Association of Colleges and Schools is to improve education through voluntary regional accreditation. The Association's Commission on Secondary Education recognizes quality education programs in secondary schools by granting membership based on the organization's self-imposed standards.

Twenty-one junior high schools and six high schools were accredited for the first time at the Association's annual meeting in Dallas, Texas, in November 1967. The addition of the 27 new schools made a total of 215 Virginia schools that held membership in the Association.

Leadership for member schools in the State is provided by the Virginia Committee which is composed of eight members and 11 associate members. Operating within the Commission to carry out the Association's policies, the Virginia Committee seeks to encourage and stimulate progress in member schools, promote conditions which will enable member schools to meet the requirements of the Association, and to assist non-member schools in their efforts to obtain membership.

The supervisor of secondary education serves as executive secretary of the Virginia Committee.

Secondary School Evaluation. The program of high school evaluation which is sponsored and organized by the State Department of Education continues to grow. Staff members of the Division of Secondary Education gave assistance and guidance to self-evaluation programs which were conducted by 34 public secondary schools during 1967-68. Thirty-four teams of visiting evaluators composed of 708 members, including administrative and supervisory personnel from school divisions, classroom teachers, and personnel from colleges and the State Department of Education, reviewed the progress made by each school and gave written appraisals of the school programs.

The following high schools completed self-evaluations and were evaluated during 1967-68: Bedford County—Staunton River High School; Chesapeake City—Churchland High School; Covington City—Covington High School; Fairfax County—Annandale High School, Jefferson High School; Fluvanna County—Fluvanna County High School; Greensville County—Greensville High School; Loudoun County—Loudoun Valley High School; Louisa County—A. G. Richardson High School, Louisa County High School; Newport News City—Denbigh High School; Portsmouth City—Cradock High School, I. C. Norcom High School, Woodrow Wilson High School; Roanoke City—Addison High School; Shenandoah County—Stonewall Jackson High School, Strasburg High School; Staunton City—Robert E. Lee High School; Tazewell County—Graham High School.

The Richmond City public schools conducted a system-wide evaluation during the year. Self-studies were made by all schools in the city and a visiting committee was organized for each school. Schools included in the evaluation program were: Armstrong High School, George Wythe High School, John Marshall High School, Maggie L. Walker High School, Thomas Jefferson High School, Albert Hill Junior High School, Bainbridge Junior High School, Benjamin A. Graves Junior High School, Binford Junior High School, Blackwell Junior High School, Chandler Junior High School, East End Junior High School, Mosby Junior High School, Randolph Junior High School, and Westhampton Junior High School.

Title III, National Defense Education Act of 1958. In 1958 Congress enacted Public Law 85-864 entitled "National Defense Education Act of 1958" (NDEA). The purpose of Title III of the Act was to strengthen instruction in science, mathematics, and modern foreign languages through the use of equipment and materials approved and acquired under the program. Under Title III matching grants of federal funds are available to states for the acquisition of specified types of equipment and materials and for state administration and supervision of the program.

In accordance with guidelines prepared by the United States Office of Education, the State Board of Education submitted a State Plan for improving instruction in the designated "critical subjects" in Virginia's public schools. This Plan was approved March 27, 1959.

Halifax County was the only school division to receive federal reimbursement during 1958-59. This reimbursement amounted to \$765. Since the NDEA Program began, approximately \$10,896,000 in federal money has been paid to local school divisions in Virginia.

In 1964 Title III of NDEA was expanded to include history, civics, geography, English, and reading. The arts and humanities, as provided for under Section 12 of Public Law 89-209, became eligible on December 28, 1966. Industrial arts was added as a critical subject when an addendum to the Virginia State Plan was approved by the State Board of Education on September 22, 1967, and became effective on October 6, 1967.

For 1967-68 Virginia was allocated \$1,962,654 in federal funds to be used for purchasing equipment and/or materials in the eligible subject areas and \$44,292 for the administration of the NDEA Title III Program at the State level. In previous years much larger allotments, which included federal funds for supervisory and related services as well as administration, were available under Title III. During 1967-68, however, the portion of the allotment needed for supervision and related services was transferred to Title V of the Elementary and Secondary Education Act (P. L. 89-10) Programs.

In 1967-68, 2,362 elementary and secondary education projects from 112 school divisions were approved for a total of \$4,571,186 in NDEA Title III funds. Federal reimbursement on these approved projects for the acquisition of equipment and materials totaled \$1,816,842. This sum included \$653,195 for equipment and materials for elementary schools and \$1,163,646 for secondary schools. Federal reimbursement under Title III for 1967-68 exceeded that for 1966-67 by \$33,417.

During the year a separate allotment of \$11,402 was provided under Section 12 of the National Foundation on the Arts and the Humanities Act of 1965. This act provides federal assistance for strengthening instruction in the arts and the humanities through a program of matching grants for public schools. Under provisions of this act, elementary and secondary projects amounting to \$22,804 were approved for six school divisions. Federal reimbursements on these projects amounted to \$11,242.

ADULT EDUCATION

The General Adult Education Program had 21,519 adults enrolled in 1,103 classes in 47 local school divisions. State funds provided 13 percent of the cost of instructors' salaries.

During the fiscal year 1968-69, State funds will increase to \$120,000 for the first half of the biennium and \$150,000 for the second half of the biennium. Reimbursements will be made on 60 percent of the instructor's salary up to a maximum salary of \$5 per hour. Funds will be available for 40,000 instructional hours.

Staff members provided information about the General Educational Development Program for military and civilian personnel and scored tests given by local school divisions. During the year 31,956 tests were administered by local school divisions and by the Department of Welfare and Institutions. The complete battery of five tests was taken by 5,056 persons; 3,511 persons took one or more individual tests. The number of persons tested during 1967-68 was an increase of 1,449 over the number tested in 1966-67. A total of 2,868 persons qualified for the General Educational Development Certificate.

The alien program conducted in cooperation with the U. S. Department of Justice assisted 777 aliens. Home study materials and information about naturalization procedures and educational opportunities were provided 215 persons.

Under the authority of Title III of the Elementary and Secondary Education Act of 1966 (Public Law 89-750) Virginia offered Adult Basic Education classes in 90 school divisions. The program, which has been in existence for three years, has had a total enrollment of 17,182 persons of whom 1,909 had completed the eighth grade.

More than 10,000 students were served by the program during 1967-68. The core curriculum, consisting of language arts and computational skills, forms the basis of the program which is designed to offer an eighth-grade education to all adults 18 years of age or older.

During the year 151 classes were offered in the Adult Education Program for Personal and Family Survival. Instruction was provided by 750 qualified teachers, and 5,657 persons completed the course—an increase of 2,115 over the number that completed the course during the previous fiscal year. Twenty-eight school divisions have had all teachers complete the Personal and Family Survival course in support of the Warden Service and Emergency Planning for schools. Since the Adult Education Service assumed supervisory responsibility for the Warden Service and Emergency Planning for Schools, 76 school divisions have been surveyed by personal contact.

ART

The Art Education Service assisted local school divisions through consultation, observation, and evaluation concerning elementary and secondary art programs and curriculum guides. Assistance was given to divisions developing art projects under provisions of Title I and Title III of P.L. 89-10. A special presentation on the advantages of aesthetic education was made by two of the State art supervisors to 26 directors of federal projects in Southwest Virginia.

Special emphasis was placed on the revision of State art curriculum guides and the expansion of in-service training through different types of conferences. Work was continued on revision of the elementary art guide, and a committee began the task of revising the art guide for secondary schools. A two-day session was held to examine behavioral objectives and their place in a State art curriculum guide.

The tenth annual week-long Art Workshop Conference was held at Virginia Polytechnic Institute from June 24-28. This workshop for art personnel as well as elementary teachers, principals, and supervisors was designed to give practical, creative experiences in the various art disciplines. A new approach used in the workshop for elementary teachers was particularly successful. This approach, used by a team of three art supervisors and an elementary supervisor in the State Department, emphasized the "why's" and the "what's", rather than the "how's" of elementary art education.

A two-day spring conference on April 26-27 brought public school art personnel, principals, and supervisors, along with college art personnel, to Richmond to hear two outstanding speakers and to discuss problems involved in art education.

On February 24 the first of several proposed regional conferences was held in cooperation with Richard Bland College for art and elementary school teachers in Southside Virginia.

Supervisory personnel of the Art Education Service attended local, state, regional, national conferences, and frequently participated in planning or conducting programs for such meetings. They also consulted with directors of the program for the education of children of migrant workers on the Eastern Shore of Virginia, assisted communities throughout the State by acting as judges for art exhibits, and served on the Humanities Study Committee of the State Department of Education.

Art personnel in the State increased from 576 to 676. One hundred and forty of these teachers served in elementary schools on a full-time or part-time basis. The number of art supervisors employed in the public schools increased from 18 to 20. Student enrollment in art education classes in 1967-68 totaled 52,209, compared with 41,000 the previous year.

DRIVER EDUCATION

During 1967-68 the Driver Education Service was established in the Division of Secondary Education.

The driver education programs continued to grow. The National Highway Safety Act of 1966 has had a marked impact, and more school divisions are making the complete driver education program, both classroom and practice driving instruction, available to eligible students.

During 1967-68, 27,774 students in 349 approved high schools completed the State-approved driver education program which was conducted in 130 school divisions. Reimbursement in State funds amounted to \$954,783. A total of 1,001 teachers taught approved driver education programs; 532 new teachers were certified during the year.

There was evidence that more school divisions were interested in expanding their driver education program by using multiple-car driving ranges and simulators. Forty-three schools are using multiple-car driving ranges and 14 schools are using approved simulators. The use of multiple-car driving ranges and simulators enables the school division to make the complete driver education program available to more eligible students at a lower per capita cost.

The Driver Education Service assisted driver education teachers and administrators in organizing and developing programs, improving instructional techniques, and selecting and using equipment and materials for classroom instruction and practice driving instruction.

Staff personnel attended State, regional, and national driver education conferences, and also enrolled in and completed advanced courses in driver education. The State Conference for Health, Physical Education, and Driver Education Teachers, which was held at Natural Bridge, was well attended.

A project to revise and combine the driver education curriculum guides into one guide was approved under provisions of the Highway Safety Act of 1966. A steering committee was selected to give guidance to a production committee which will produce the driver education curriculum guide.

An annual status report submitted to the Insurance Institute for Highway Safety resulted in the State receiving the Driver Education Achievement Award for improvement and expansion of driver education programs.

ENGLISH

Activities of the English program during 1967-68 may be divided into three categories: services requested by Virginia localities and professional organizations, those conducted directly by the English Service, and those rendered to the profession nationally.

The services to school divisions and State organizations included assisting school systems with the development of curriculum guides and new courses, several of which were based on Federal projects. The English office also worked with colleges to establish objectives for institutes for teachers. Considerable assistance was given to English groups in planning and conducting local, regional, and State conferences as well as a tri-state conference. One member of the staff served on the executive committee of the State English association, and another served on the executive committee of a district education association.

The improvement of English instruction for low-achieving pupils was emphasized in activities conducted directly by the English Service. This work to benefit low-achievers included a Statewide survey of course offerings, completion of a pilot study, and the development of a curriculum bulletin. In other areas, the English staff wrote guidelines for teachers using newly adopted linguistically oriented textbooks, and prepared criteria for the 1968 adoption of high school dictionaries. One staff member served on the Division's Humanities Committee and formulated a report from the English Education Service for the committee report.

Contributions by the Service to the profession nationally consisted of participating in the Conference on English Education, representing The National Council of Teachers of English (NCTE) at a regional meeting of the Conference on Teacher Education and Professional Standards, and participating in the annual convention of the NCTE. A staff member was a program participant at a conference of the Association of State English and Reading Specialists.

FOREIGN LANGUAGES

In 1967-68 the number of modern foreign language teachers increased from 1,139 to 1,192. The number of Latin teachers, however, declined from 298 to 283.

Enrollments in foreign languages were as follows:

	<i>Level I</i>	<i>Level II</i>	<i>Level III</i>	<i>Level IV</i>	<i>Level V</i>	TOTAL
French	24,169	15,569	5,762	2,016	438	47,954
Spanish	22,239	12,496	3,813	1,076	178	39,802
Latin	8,851	5,939	1,118	508	13	16,429
German	3,294	2,015	774	208	5	6,296
Russian	299	164	58	33	4	558
Chinese	8	8
Totals	58,860	36,183	11,525	3,841	638	111,047

In addition to the above enrollments, some students are enrolled in non-credit foreign language courses. Included in this group are classes in Portuguese and Chinese culture and language.

The preparation of a curriculum guide for foreign languages is in its final stages. This guide, to be completed and distributed during 1968-69, will be the first publication produced by the State Department of Education for all foreign language teachers.

A survey report on the prevalence and use of the language laboratory in Virginia was completed and distributed through the cooperative efforts of the Division of Educational Research and the foreign language staff. A pilot study involving several history courses taught in a foreign language was concluded. Requests for the report on the study are numerous, indicating that there is much interest throughout the country in teaching an academic subject in a foreign language.

Workshops emphasizing new teaching techniques were conducted on regional and division levels. These workshops seemed to generate much interest and enthusiasm among the participants.

With impetus from the foreign language staff, six colleges and universities sponsored summer foreign language institutes, which were attended by approximately 120 teachers interested in contemporary methodology and general professional development.

The Statewide conference held at Natural Bridge for teachers and local supervisors of foreign languages was well attended and was centered on teaching the skills of reading and writing.

HEALTH, PHYSICAL EDUCATION, SAFETY AND RECREATION

The Health and Physical Education Service provided leadership and assistance to the elementary and secondary schools in the development and improvement of health education, physical education, and general safety education programs. In addition, staff members assisted local school divisions in the development and general improvement of school-community recreation programs.

The personnel of the Service assisted local school divisions in curriculum planning, in in-service education in physical education for classroom teachers in the elementary and secondary schools, in the selection of materials and equipment, and in the evaluation of student progress and physical fitness. It also conducted the annual Statewide conference for health and physical education teachers in the State's colleges and public schools.

The annual summary of the health and physical fitness status of pupils was compiled from information submitted by local school divisions. The summary showed continual improvement in the physical fitness status of boys and girls in

the State; revealed a decrease in the number of defects and deficiencies; and an increase in the number of corrections. Copies of the summaries were distributed to all school divisions in September 1967.

Two physical education camps for high school girls were conducted at 4-H Camp Farrar, Virginia Beach. Three hundred and forty-five girls from 83 junior and senior high schools attended. Interest in the camp continues to increase. Approximately 140 applications had to be returned. The camps have provided opportunities for girls to have a camping experience, to gain a better understanding of physical education, to develop leadership, and to develop an interest in the teaching profession.

Colleges preparing teachers for health and physical education have frequently looked to the Service for guidance and assistance in the development of teacher-education programs. The College Study Committee on Certification Requirements for Teachers of Health and Physical Education met to revise the Content Identification Chart used in the approval of major programs.

A Lifetime Sports Education Project involving tennis, golf, and bowling was implemented throughout the State. A Bi-State Leadership Clinic, under the auspices of the American Association of Health, Physical Education and Recreation (AAHPER) Lifetime Sports Education Project, was conducted for Virginia and North Carolina during September 21-23 at the 4-H Educational Center, Wirtz, Virginia. The 57 persons attending this clinic from Virginia had the responsibility for organizing, directing, and leading the follow-up clinics. Thirty-three clinics were conducted throughout the State and were attended by 1,407 teachers. The objective of the project was to train teachers to teach these "carry-over" sports as a part of the regular physical education offering.

Continued emphasis on upgrading the elementary physical education program was apparent throughout the school year. This was evidenced by: (1) an increase of approximately 300 physical education teachers assigned to elementary schools; and (2) an increase in the number of visits to elementary schools by the health and physical education staff.

HISTORY, GOVERNMENT, AND GEOGRAPHY

In efforts to improve instruction in history and the social sciences, staff members of the History, Government, and Geography Education Service assisted secondary school personnel in the following ways:

1. Participated in curriculum planning, selection of materials, development of new courses, and evaluation of instructional activities
2. Conducted local in-service meetings, demonstration lessons, and curriculum workshops
3. Planned a Statewide conference for teachers of history and the social sciences
4. Cooperated with the School Libraries and Textbook Service and the Bureau of Teaching Materials in evaluating supplementary materials
5. Assisted in the administration of National Defense Education Act, Title III, funds for instructional materials and equipment for history, civics, and geography

6. Directed a program of in-service education in basic economics for teachers of the seventh grade, for the courses in Virginia and United States History (eleventh grade), and Virginia and United States Government (twelfth grade) in cooperation with the Division of Elementary and Special Education, the Division of Teacher Education and Certification, and public institutions of higher education
7. Assisted selected schools involved in a pilot study which focused on a block program with history and English in grades seven and eight
8. Prepared a statistical analysis on the status of teaching in the fields of history, government, economics, and geography
9. Planned a one-day meeting of local supervisors of history and the social sciences
10. Maintained a professional library which included research studies, curriculum guides, and general titles on history, government, geography, economics, and related areas
11. Prepared a special bibliography to encourage the establishment of professional libraries in history departments of all secondary schools.
12. Served on visiting committees in the evaluation of secondary schools.

In addition to specific services rendered to secondary school personnel, staff members participated in the following activities:

1. Attended regional and national professional meetings related to the teaching of history, government, and geography
2. Cooperated with various agencies and organizations such as the Senate Youth Program, chambers of commerce, and Model General Assembly in citizenship education projects
3. Spoke to lay groups interested in history, government, and economic education
4. Assisted representatives of colleges engaged in preparing teachers
5. Worked toward the completion of curriculum guides for courses in Virginia and United States History and civics
6. Initiated plans for a bulletin on documents, symbols, and traditions of American democracy
7. Participated in various studies and committees, including the Humanities Study Committee, the Advisory Committee for ETV courses in history, and the Executive Committee of the Virginia Council for the Social Studies.

MATHEMATICS

During the year members of the Mathematics Education Service were engaged in:

1. Visiting school divisions to improve mathematics instruction
2. Participating in and attending meetings on mathematics education
3. Sponsoring one Statewide and one regional mathematics conference and

assisting with one national conference sponsored cooperatively by the Department and the National Council of Teachers of Mathematics

4. Serving as members, coordinators, and chairmen of high school evaluation committees using the 1960 *Evaluative Criteria*
5. Speaking at district, regional, and State mathematics meetings and at meetings of principals, supervisors, and college mathematics classes
6. Preparing criteria to be used in the selection of mathematics textbooks for the years 1969-75
7. Preparing for publication, "A Survey of Freshman Mathematics Course Offerings in Virginia Colleges"
8. Serving as members of advisory boards of State and national professional organizations and as members and/or chairmen of committees of the National Council of Teachers of Mathematics
9. Participating in two Computer Science Institutes
10. Planning and teaching in-service mathematics classes for teachers and for parents.

MUSIC

Every school division except one was visited by at least one of the four-member staff this year. Follow-up visits for consultation, teachers' workshops, and demonstration teaching were made to 54 divisions.

For the second year, local music supervisors requested this Service to sponsor a supervisors' seminar. During the two-day period, staff members presented new materials and discussed problems of mutual interest with the supervisors. Several superintendents, whose divisions did not employ supervisors of music, requested that they be allowed to send observers. This seminar proved to be one of the most successful activities sponsored by this Service during the year.

The annual State Music Conference, which the Service sponsored during mid-January, drew approximately 225 participants representing public schools, colleges, and private schools. Inclement weather prevented a larger attendance.

Approximately 1,220 music teachers were employed in Virginia schools during the year, representing an increase of approximately 10 percent over the preceding year. The increase was due partially to the number of music personnel employed under Titles I and III of the Elementary and Secondary Education Act (P. L. 89-10).

The Virginia Music Camp offered opportunities for professional growth and stimulation to secondary choral teachers, instrumental teachers, elementary classroom teachers, and music majors working at the elementary level. There were 875 participants, including 157 teachers. The remaining 718 enrollees were choral and instrumental pupils representing grades eight through twelve.

The number of teachers registered at camp this year was 11 percent lower than the previous year. There is reason to believe this was, in part, because of increased opportunities for summer employment under such federally sponsored programs as "Head Start".

During the year the music education staff compared enrollments in music classes 1967-68 with those for 1962-63. The following list shows classes and percent of increase in enrollment over the five-year period: general music, 340 percent; girls glee club, 121 percent; music history and literature appreciation, 10 percent; band, 43 percent; boys glee club, 177 percent; and orchestra, 129 percent.

It is gratifying to note the continued impact of the educational activities sponsored by the Old Dominion Symphony Council. Approximately 60,000 children attended 49 concerts under this plan. Further, the Council offered four ETV programs to school divisions, and was one of the motivating agencies for the development of a series of 15 programs, entitled "Music and the Human Experience," which will be telecast during the 1968-1969 school year in Central Virginia and in the Norfolk, Harrisonburg, and Roanoke areas.

This Service was involved in the planning and development of the ETV series, and one staff member served as consultant to the Central Virginia Educational Television Corporation concerning other planned music telecasts.

Staff members also engaged in the following activities: (1) reviewed the organizational pattern, facilities, materials, and equipment for instruction at 157 schools; (2) gave pre-evaluation services to three high schools; (3) participated in 40 in-service workshops; (4) held nine consultations on curriculum development; (5) attended 29 State and regional educational events and conferences; (6) gave services to 18 colleges; (7) helped with field evaluation of eight federal projects; and (8) attended 24 State and national workshops and conferences.

SCIENCE

Enrollment in science courses in Virginia in 1967-68 totaled 283,967 students in grades seven through twelve. The offerings in grade eight show a decrease in general science courses and a significant increase in specialized courses such as physical science and earth science. There was also a significant increase in the enrollment of the Biology BSCS—Special Materials course. The 1967 summer school science program enrolled 4,930 high school students.

Approximately 650 teachers and administrators attended the Fifth Annual State Science Teachers Conference which was held in October 1967 at Virginia Beach.

The Science Education Service cooperated with the Division of Teacher Education to arrange the visits of six foreign science teachers who were participating in the International Teacher Development Program sponsored by the U. S. Office of Education. Six-week teacher assignments were made as follows: Miss Gladicia Gunaratne, of Ceylon, to Covington City; Miss V. K. T. Bhadra Nanayakkara, of Ceylon, to Newport News City; Gholamali Ghassemi, of Iran, to Fairfax County; Masoud Nader, of Iran, to Portsmouth City; Banchoh Sudaprasert, of Thailand, to Chesterfield County; and Miguel Angel Moyano, of Uruguay, to Roanoke County.

The Service also was successful in selecting participants for the Virginia Flight Seminar for Youth and the National Youth Science Camp in West Virginia. The NASA Spacemobile was scheduled for approximately 200 schools during the year.

The Science Curriculum Study Committee appointed in 1967 to assist the State Department of Education in evaluating and reviewing the junior high school science program is continuing its work in the preparation of curriculum guides.

---------------------------	----------

DIVISION OF SPECIAL SERVICES

The Division of Special Services assists the public schools in the areas of guidance and testing, school buildings, school plant surveys, pupil transportation, educational television, teaching materials, film production, and school libraries and textbooks. Its scope of services affects many phases of the public school program. During the 1967-68 school year, the Division conducted a program of testing, study, and visitation:

1. To discover and promote practices and procedures which may be used to improve instruction and guidance
2. To assist localities by making school plant surveys and in planning and constructing efficient and economical school buildings
3. To aid localities in providing safe, adequate, and efficient pupil transportation systems
4. To encourage and assist localities to enrich children's learning experiences through the provision of educational television, adequate library services, and materials, including textbooks and a variety of audio-visual materials and equipment.

Reports of the 1967-68 activities of the services in the Division of Special Services follow in this order: Guidance and Testing, School Plant Surveys, School Buildings, Pupil Transportation, Educational Television, Bureau of Teaching Materials, Film Production, and Libraries and Textbooks.

GUIDANCE AND TESTING SERVICE

Purpose and Scope

The Guidance and Testing Service assists local school personnel in extending and improving guidance services in the public schools of Virginia.

In scope, the activities of the Guidance and Testing Service include: visiting and consulting with local school personnel; participating in conferences, institutes, and workshops; evaluating guidance services in local schools; working with community groups and agencies interested in guidance; and developing and providing certain materials for local schools.

Guidance and testing personnel also assist school divisions in accomplishing established objectives:

1. Improving the guidance and testing services and extending these services to all pupils
2. Employing qualified guidance personnel to render guidance services
3. Assisting each pupil in understanding himself—his strengths, limitations, interests, and needs
4. Assisting each pupil in making a wise choice of his program of study and in planning for continuing education beyond high school
5. Assisting pupils in making vocational choices compatible with their interests and abilities
6. Assisting pupils in developing their potentialities, achieving worthwhile goals, and assuming responsibility for their decisions and actions

7. Providing information to parents so that decisions made by parents and pupils will be based on a realistic understanding of the pupil's abilities, interests, and the requirements involved in his educational and vocational goals
8. Providing in-service training for the professional growth of staff members
9. Evaluating the outcome of guidance activities to determine effectiveness and to discover additional ways of improving these services.

Activities and Accomplishments

During the school year, members of the Guidance staff visited every school division in the State and worked with individuals and groups interested in guidance. The staff participated in numerous conferences and meetings, at local, State, and national levels, such as: pre-school and other local conferences for teachers and counselors; district guidance meetings; meetings with counselor education classes, local directors of testing, and civic groups; annual guidance conferences of counselor education institutions; and State conferences with division superintendents, secondary and elementary principals, supervisors, and visiting teachers. The staff also participated in meetings and conferences sponsored by the following professional associations: Virginia Education Association, American Vocational Association, American Personnel and Guidance Association, Virginia Personnel and Guidance Association, Southern Association for Counselor Education and Supervision, Virginia Counselor Educators, College Admissions Officers, Virginia Association of Collegiate Registrars and Admissions Officers, Central Educational Television Committee, and the United States Office of Education.

A State-sponsored guidance institute was held in June, 1968 to help counselors improve their effectiveness in the area of vocational guidance. The institute was made possible by an appropriation of the 1966 General Assembly which provided financial assistance to counselors attending the institute.

Staff members from the Guidance Service and the Division of Vocational Education supervised the institute, which was attended by 298 principals, counselors, and vocational educators. This institute was conducted in addition to the guidance courses offered during regular and summer sessions by institutions of higher education.

By June 30, 1968, more than 1,700 counselors met or exceeded the minimum qualifications adopted by the State Board of Education. Of these, more than 800 hold masters degrees.

During the 1967-68 school year, guidance and testing materials were distributed to all secondary schools. These materials included: *The Occupational Outlook Handbook*, 1968-1969 Edition, *The College Blue Book*, Twelfth Edition, 1968, *American Junior Colleges*, Sixth Edition, 1967, *The Industrial Directory of Manufacturing in Virginia*, 1967-1968 Edition, and three issues of *Guidance News and Views*. The bulletin, *Financial Assistance to Attend Virginia Colleges and Universities*, has been revised and will be sent to all school division offices and secondary schools in the fall of 1968.

Pilot programs in guidance, supported by Title V-A of the National Defense Education Act, are in operation in five elementary schools in different areas of the State. Three of these programs terminated their pilot projects with the 1967-1968 school year. The other two programs are in the second year of operation.

Reimbursement to school divisions for guidance personnel was made through an appropriation of \$1,365,110 from the General Assembly of Virginia and \$460,000 from the National Defense Education Act, Title V-A. The reimbursement was made to localities at the rate of 60 percent of the State Minimum Salary Scale per position for 500 counselors. A total of 95 counties and 33 cities received funds totaling \$1,825,110. Counselors in these positions devoted four or more class periods per day to counseling.

The Statewide Testing Program continues to place emphasis upon the use of tests for the improvement of guidance and instruction.

The following tests were administered to approximately 578,802 pupils in 1967-1968. An asterisk indicates those grades in which testing was optional.

*Grade 1—Metropolitan Readiness Tests, Form A—

These tests involved approximately 84,704 pupils.

*Grade 2—Kuhlmann-Anderson Intelligence Tests, Form B—

These tests involved approximately 60,259 pupils.

*Grade 3—Kuhlmann-Anderson Intelligence Tests, Form CD—

These tests involved approximately 10,253 pupils.

Grade 4—The Lorge-Thorndike Intelligence Tests, Level 3A

SRA Achievement Series, Form C—

These tests involved approximately 87,148 pupils.

*Grade 5—The Lorge-Thorndike Intelligence Tests, Level 3A—

These tests involved approximately 11,791 pupils.

*Grade 6—The Lorge-Thorndike Intelligence Tests, Level 3A—

These tests involved approximately 26,427 pupils.

Grade 7—California Tests of Mental Maturity, 1963—S Form—Level 3

Iowa Silent Reading Tests, Form DM—

These tests involved approximately 83,850 pupils.

Grade 8—Differential Aptitude Tests, Battery, Form L—

These tests involved approximately 83,268 pupils.

Grade 9—School and College Ability Tests, Form 3A

Sequential Tests of Educational Progress, Form 3A—

These tests involved approximately 73,057 pupils.

Grades 10*, 11, 12*—School and College Ability Tests, Form 2A

Sequential Tests of Educational Progress, Form 2A—

These tests involved approximately 58,045 pupils.

All answer sheets for grades four through twelve were machine-scored by test scoring agencies and the results were sent to the school divisions and to the Guidance and Testing Service of the Department. Tests for grades one, two, and three were scored locally and duplicate copies of class reports were sent to the Department.

SCHOOL PLANT SURVEYS SERVICE

Purpose and Scope

The School Plant Surveys Service was established in February 1967 with the appointment of an assistant supervisor of school plant surveys.

School plant surveys have been conducted by the Department for many years but, prior to the establishment of the School Plant Surveys Service, no member of the staff was available to devote full time to this work. The creation of the School Plant Surveys Service and the appointment of an assistant supervisor enabled the Department to provide more prompt and effective service to the localities in the study and evaluation of school plant needs.

The major functions of this Service are to organize and direct the work of school plant survey committees, to be responsible for the preparation of the reports of the survey committees, to work with the local school divisions in implementing proposed building programs, to aid in the development of educational specifications, and to work with architects in interpreting the specifications.

Accomplishments

During the 1967-68 school year comprehensive school plant surveys were made in the cities of Staunton and Lynchburg and in the counties of Albemarle, Grayson, Loudoun, and Washington. In addition, limited studies were made in the cities of Danville and Hopewell, and in the counties of Bath, Charles City, Goochland, King George, Louisa, Surry, and Wise. These studies ranged from site evaluations to school plant needs in certain areas of the school divisions.

Eighty-five professional persons helped to conduct these surveys. Forty-eight participants were staff members of the Department; 22 were superintendents of school divisions; six were college professors; two were supervisors of instruction in a local school division; five were retired division superintendents; two were assistant superintendents; one was a school board chairman, and one was a staff member of a professional organization.

SCHOOL BUILDINGS SERVICE

Purpose and Scope

The functions of the School Buildings Service are:

1. To review and approve plans and specifications for school buildings.

Section 22-152 of the Code of Virginia and regulations of the State Board of Education stipulate that the plans and specifications for all public school buildings, including additions and major alterations, shall be approved by the Superintendent of Public Instruction.

The *School Planning Manual*, prepared at the direction of the State Board of Education, contains regulations governing the planning and construction of school buildings in Virginia. This manual, which is made available to local school authorities and to architects and engineers, provides the basis for the review and approval of plans by the School Buildings Service.

2. To assist local school authorities in planning functional school plants.

Members of the staff of the School Buildings Service assist local school authorities in the study of building needs by analyzing proposed

educational programs, population trends, enrollment patterns, and the adequacy of facilities and sites. Planning conferences are held with division superintendents, architects, and engineers. Programs for each new school and addition are reviewed in terms of current trends in school offering, size, and organization.

Preliminary plans are studied to obtain the best possible relationships of instructional spaces, services, housekeeping, safety, comfort, and economy, which are consistent with the site and available funds. Final working drawings are reviewed for fire safety, planning and equipment details, construction, mechanical equipment, and adequacy of contract provisions.

3. To maintain school plant records.

Plans, specifications, and cost data are on file for all public school plants constructed in Virginia since 1948. An incomplete file is maintained for earlier schools. Drawings are being microfilmed, and prints or duplicate microfilm will be available to local school authorities.

A new school plant inventory and reporting system is being developed through the Division of Educational Research and Statistics to coordinate school plant identification for all agencies and to provide current information on school plant needs, cost, maintenance, and efficiency.

4. To suggest changes in school building regulations.

Studies are made at the suggestion of the Governor's Advisory Research Committee in an attempt to keep school building regulations up to date and in line with current educational developments. These studies involve reviews of information on building design, equipment, and construction, and on research related to school plant planning.

Activities and Accomplishments

During the 1967-68 year, plans and specifications for 227 school construction projects were approved, as listed in the following table. Of these, 70 approvals were for prefabricated classroom units, distributed as indicated in column (PF). These units were approved for temporary use.

<i>Type School</i>	<i>New Schools</i>			<i>Additions</i>				<i>Total</i>
	<i>County</i>	<i>City</i>	<i>Total</i>	<i>County</i>	<i>PF</i>	<i>City</i>	<i>PF</i>	
Elementary.....	23	8	31	46	44	25	5	120
Junior High, Intermediate...	1	2	3	5	2	5	0	12

Vocational.....	2	0	2	2	0	1	0	3
Totals.....	30	10	40	78	64	39	6	187

Staff members of the School Buildings Service participated in school plant surveys and one school division evaluation. Twenty visits to school divisions were made to assist with planning and construction projects.

The microfilm file of plans was put into operation with a reader and a reader-printer. At the end of the year, approximately one-third of the plans on file had been transferred to microfilm.

Construction Project: A—New school (initial building on a site).

S—Prefabricated unit (relocatable) for temporary use.

B, C, etc.—Additions or alterations at an existing school.

Pupil Stations: Elementary design capacity of the building project, based on 20 Kindergarten, 25 Primary, and 30 Upper Elementary Pupils per class.

Flexible CR: Rooms with folding partitions. These rooms are included in the room count in columns 2, 3, and 4.

School Name: Note that many new school construction projects are approved before a permanent name has been selected. Names may therefore change, but the School plant Identification Number is a permanent identification of the school plant.

[illegible]

Construction Project: A—New school (initial building on a site).

S—Prefabricated unit (relocatable) for temporary use.

B, C, etc.—Additions or alterations at an existing school.

Secondary design capacity varies for different facilities. The operating capacity is less than the pupil station total.

Note that many new school construction projects are approved before a permanent name has been selected. Names may therefore change, but the School Plant Identification Number is a permanent identification of the school plant.

PUPIL TRANSPORTATION

Purpose and Scope

The major purpose of the Pupil Transportation Service is to promote the safe transportation of pupils to and from public schools. More than 60 percent of the pupils attending public schools in the State are transported in school buses. The number of pupils has been increasing at an annual rate of approximately three percent. Specifications for buses are established to provide maximum safety for pupils, as well as economy of operation. Greater pupil safety is also provided by the careful selection and proper training of school bus drivers. A good transportation system must be adequate, efficient, and economical. Such a system has the following characteristics:

1. Sufficient buses of a type which will provide reasonable comfort, prevent overcrowding, and serve pupils and schools within reasonable time limits.
2. Bus routes which permit pupils to travel as directly as possible to and from school and routes planned to permit maximum use of the buses, with minimum mileage and minimum waiting periods at schools.
3. The use of school buses that are properly designed, with provisions for a good preventive maintenance program and instruction of drivers in the care of equipment.

All school buses are inspected each year by representatives of the Pupil Transportation Service. Monthly inspections by competent mechanics also are required. This procedure is intended to insure that all buses meet all requirements and that they are maintained in a safe operating condition. Whenever an inspection indicated a need for corrections, subsequent reports showed that the deficiency had been remedied.

Each year meetings with school bus drivers are held throughout the State to discuss many phases of school bus transportation. Requirements which must be met to qualify as a school bus driver are explained and safe transportation of pupils, observance of State laws, regulations of the State Board of Education, local regulations, and safe-driving practices are emphasized at these meetings.

An adequate program of preventive maintenance is stressed as a means for providing safe and economical transportation. Experience has proved the value of this program. Emphasis is placed on the importance of properly designed facilities and the necessity for good mechanics in an efficient pupil transportation program. Plans and specifications for facilities and equipment have been used by local school officials to provide many well-equipped school bus repair shops. Visits to shops, discussions of maintenance problems with mechanics, and recommendations for better methods and practices have contributed to an improved maintenance program.

Surveys of transportation systems are made upon request. Maps showing recommended bus routes are prepared, presented, and explained to school officials. Such transportation surveys involve a careful analysis of the data obtained from the school system under study and the preparation of a spot map which shows where pupils board buses. Routes are planned so that buses can operate at maximum capacity with time and distance reduced to a minimum.

Accomplishments

Safety meetings, which were attended by school bus drivers, substitute drivers, mechanics, safety patrols, superintendents, law enforcement agents, and

others connected with pupil transportation, were held in school divisions throughout the State.

The Regulations Governing Pupil Transportation were revised and amended. The changes were adopted by the State Board of Education on June 7, 1968 to become effective on September 1, 1968.

During 1967-68 the number of buses in operation increased by 211; there was a gain of 18,120 in the number of pupils transported; and an increase of 1,236,634 in the miles traveled in transporting pupils.

From these figures, and those for the past five years given in the following table, it will be noted that the number of children transported, the number of buses operated, and the number of miles traveled have continued to increase.

TABLE 9—GROWTH IN PUPIL TRANSPORTATION—1963-68

YEAR	Number Pupils Transported (ADA)	Number Buses	Number Miles	Average Number Pupils Per Bus Per Day	Average Number Miles Per Bus Per Day	Cost Per Pupil	Cost Per Mile	Cost of Operation Less Gas Tax
1963-64	505,261	5,496	46,678,744	92	47	\$ 22 18	\$.235	\$11,205,593 24
1964-65	524,857	5,769	48,346,744	91	47	22 96	.249	12,050,784 68
1965-66	538,544	5,945	49,347,492	91	46	23 76	.259	12,796,362 84
1966-67	555,829	6,157	50,824,192	90	46	25 93	.284	14,410,405 47
1967-68	573,207	6,368	52,060,826	90	45	26 91	.297	15,447,463 45

During the year, some school divisions were aided in routing school buses. Assistance was given to school building survey committees, and a member of the Pupil Transportation Service served on some of these committees.

Thirty-four school divisions lowered their per unit cost of operation and 28 divisions reduced their total net cost of operation for the year. These reductions are attributed largely to improved maintenance programs and better planned bus routes.

The number of buses, classified according to type of ownership and operation, is shown in the following table:

TABLE 10—NUMBER OF BUSES OPERATED ANNUALLY—1963-68

EDUCATIONAL TELEVISION SERVICE

Purpose and Scope

The functions of the Educational Television Service are as follows:

1. To administer State funds to school divisions for the support of educational television in accordance with regulations of the State Board of Education.

For the biennium ending June 30, 1968 the General Assembly appropriated \$1,000,000 to assist localities utilizing ETV. This fund is distributed to counties and cities on a 50-50 matching basis not to exceed \$1.00 in State funds per pupil in membership in schools using educational television on a systematic basis as an integral part of the school program.

2. To cooperate with other agencies and organizations within the State which are concerned with the development and operation of educational television.

Every effort is made to maintain a close working relationship with all agencies and organizations, both official and unofficial, that are concerned with the development and use of ETV in the State, including the Virginia Advisory Council on Educational Television, the educational directors of ETV stations, and local groups that seek to improve educational programs through the use of educational television. This relationship enables the Department to keep abreast of developments and programs and to identify areas in which it can render assistance.

3. To work with school divisions in developing more effective use of educational television.

The Educational Television Service:

- (a) Assists local school divisions in planning and conducting workshops, short courses, and seminars that develop knowledge and skills for the effective use of television.
 - (b) Assists in planning and conducting demonstrations, seminars, and workshops for prospective studio teachers.
 - (c) Develops local leadership by working with personnel responsible for encouraging and improving the use of television in local school systems.
4. Encourages institutions of higher education in the development of programs for training teachers in the use of educational television.

During the period of professional preparation, student teachers should become skilled in the teaching media, materials, and methodology pertaining to educational television. Such preparation enables the "receiving" teacher to play her supporting role more effectively.
 5. Coordinates activities related to instructional television in the public schools.

The Department encourages the exchange of information and services among the ETV stations. The exchange of video-tapes, for example, reduces duplication of effort and allows for specialization by the stations in the production of high quality programs.

6. Provides information concerning developments and activities related to instructional television in Virginia and in other states.

Many inquiries concerning ETV in Virginia and in other states come to the Department. The ETV Service has developed library resources which enable it to provide a centralized information service for ETV personnel and for other interested persons and groups.

Activities

The ETV staff engaged in the following activities during the 1967-68 school year:

1. Attended national and regional conferences of the National Association of Educational Broadcasters.
2. Responded to many inquiries concerning the handbook, *Instructional Television—A Utilization Guide for Teachers and Administrators*. The third printing of the guide was completed in June, 1968. To date 115,000 copies have been printed with approximately 90,000 going to 30 different states.
3. Developed and participated in the production and taping of special educational television courses with two other services of the State Department:

- (a) *Farm Management*—a series of 10 30-minute lessons was completed in cooperation with the Agricultural Education Service.

This course, designed for young and adult farm groups, provides instruction in the basic economic principles of farm production and shows how these principles apply to farm management.

- (b) *Data Processing for Business Teachers*—a series of 30 half-hour lessons was completed with the cooperation of the Business Education Service.

This course is designed to give the business teacher, who has little background in data processing, an understanding of automated procedures and how these procedures are used in carrying out office functions. Eight colleges offered credit for the successful completion of the series. The Division of Teacher Education and Certification supported this project by reimbursing teachers the tuition paid to the participating colleges.

4. Administered the fund appropriated by the 1966 session of the General Assembly for reimbursing schools using instructional television programs. A total of \$556,722.08 was paid to school divisions during the 1967-68 school year. The reimbursement exceeded by approximately \$222,000 the sum distributed for 1966-67 and was based on enrollment of 677,961 pupils in 1,253 public schools that used ETV during 1967-68. The previous year's reimbursement was based on enrollment of 532,516 pupils in 1,002 public schools using ETV.
5. Worked with teachers and administrators in pre-school conferences and workshops on techniques for the utilization of instructional television programs.

6. Shared with ETV personnel from other states ideas and practices conducive to more effective utilization procedures for the classroom.
7. Created and staffed an ETV exhibit at the State Fair of Virginia to inform the public of the developments of educational television within the Commonwealth.
8. Wrote the script and began production on a film, "The Fourth Network," to tell the ETV story. This film will be made with the cooperation of the ETV stations and the Film Production Service of the State Department of Education.
9. Made preliminary plans for an Educational Television Institute to be held next year.

BUREAU OF TEACHING MATERIALS

Purpose and Scope

The major purpose of the Bureau of Teaching Materials and of the four regional bureaus, located at Longwood College, Madison College, Radford College, and the University of Virginia, is to improve instruction through the effective use of media for instructional purposes.

The following services are provided by the State and regional bureaus:

1. The distribution of educational motion pictures to: public schools and State-supported colleges; private degree colleges engaged in training teachers (by special contract); State Department of Health, county and city health departments; State and county agriculture agencies; parent-teacher associations, and other State agencies.
2. The provision of consultative services to local school divisions in the selection of various kinds of media for instruction.
3. The preparation of listings of filmstrips, slides, and recordings for purchase with State matching funds provided through the School Libraries and Textbooks Service.
4. The evaluation of educational motion pictures for purchase by the State and regional bureaus of teaching materials and by local school divisions.
5. The provision of assistance in the pre-service and in-service training of supervisors and teachers in the use of media for instruction.
6. The duplication of programs on tapes to be used in classroom instruction.

Accomplishments

The following accomplishments were realized during the 1967-68 school year:

DISTRIBUTION OF EDUCATIONAL MOTION PICTURES. A total of 417,686 educational motion pictures were booked from State, regional and division teaching material centers. The number of prints of educational motion pictures available is 50,891, an increase of 5,869 over the previous year.

PUBLICATIONS. A supplement to the bulletin "Educational Motion Pictures for Virginia's Public Schools" was prepared and distributed to all public schools.

A revised publication, "Educational Tape Recordings," was prepared. This publication will be distributed to schools in September 1968.

TAPE DUPLICATING EQUIPMENT. New equipment to duplicate programs on tape has been acquired by State Bureau of Teaching Materials. A catalogue of programs has been prepared and will be distributed to all public schools.

EVALUATION OF MATERIALS. During 1967-68 the Department's professional staff previewed and evaluated 683 motion pictures. Purchases for the State and regional bureaus were made from this approved list. The staff also previewed and recommended for the State Library list 625 filmstrips, 676 transparencies, 329 recordings (disc and tape), 91 slides and 100 flat pictures and study prints.

GUIDELINES. Guidelines for personnel, materials, and equipment for a functioning materials program are being developed.

MEETING OF REGIONAL DIRECTORS. The annual meeting of the directors of the regional bureaus of teaching materials was held in May. Two new directors who will serve regional centers were presented. At this meeting, policies and problems were discussed and plans were made for the operation of the bureaus for 1968-69 school year.

EXPERIMENT AT LONGWOOD REGIONAL BUREAU. Through the cooperation of Longwood College an experiment on booking procedures, using data processing equipment, will be in operation during 1968-69.

FILM PRODUCTION SERVICE

Purpose and Scope

The primary responsibility of the Film Production Service is to produce educational motion pictures and filmstrips on the history and natural resources of Virginia for the Virginia public schools.

The secondary responsibility is to produce films and filmstrips in other areas of public education as needed by the State Department of Education, and other State agencies.

Another responsibility of the Film Production Service is to support the Department of Education by the production of informational and public relations color slides, tape recordings, and other audio visual aids.

The Film Production Service has the supervisory and technical staff to produce 16mm motion pictures in sound and color and all phases of still photography. In producing educational motion pictures the staff does the research, writing, photography, editing, recording sound, and distributing of the finished film.

Accomplishments

During the year the following films were completed:

P. H. N.: A Day With a Public Health Nurse: 25 minutes, black and white. The film follows a public health nurse as she performs her various duties in both a clinic setting and the patients' homes. As the day progresses, it becomes apparent that both the variety and the personal nature of the work contribute to its appeal as a profession.

Skills in Physical Education: A Demonstration: 37 minutes, color. A demonstration of physical education skills from elementary grades through senior high school. Methods and techniques are shown which may be helpful to schools in their physical education programs.

Virginia Geography Series: The last four in a series of seven to accompany the Virginia geography textbook were completed:

CHAPTER 4—"The Shape of the Land of Virginia, Tidewater"

CHAPTER 5—"Middle Virginia, The Piedmont"

CHAPTER 6—"Western Virginia, Mountains, Ridges, and Valleys"

CHAPTER 7—"The Land, The Water, and The People."

Virginia Forestry Series: One color filmstrip completed, the ninth in a series of 10. The title is "Protecting the Forest."

The Practical Nurse Program: A set of slides made to be used by the Industrial Education Service in a program for high school students in the practical nursing course.

Services

Support and assistance were given to the following conferences: high school principals, science supervisors, elementary supervisors, guidance personnel, State supervisors, manpower training, special education, and the Virginia Music Camp.

Special photographic help was given to the Office of Public Information, the Division of Secondary Education, the Division of Elementary Education, and the Division of Vocational Education.

Films in Progress

NEW STATE PARKS: A film for the State Park Commission on five new State parks which are being developed.

EDUCATIONAL TELEVISION: A film to show the importance of Educational Television to the Virginia schools as well as to the public.

SCIENCE SAFETY: A film or series of films to show safe practices in the classroom science labs of the public schools.

VOCATIONAL OFFICE TRAINING: A film to introduce high school students to the V. O. T. Program. This is a revision of an obsolete film.

Film Distribution

A total of 7,700 filmstrips and 237 motion pictures produced by the Film Production Service were sold to public schools in Virginia during the year. Twenty-one prints were sold out of State and more than 140 rentals of films were made to public schools in other states.

SCHOOL LIBRARIES AND TEXTBOOKS SERVICE

Purpose and Scope

The School Libraries and Textbooks Service assists local school divisions in improving the quality of library services in the public schools of the State. Guidance and leadership are provided by:

1. Offering supervisory and consultative service through visitation and correspondence
2. Assisting in the establishment of library programs in new schools
3. Preparing and distributing lists of approved teaching materials, bulletins, and memoranda
4. Maintaining a professional library and a collection of juvenile literature to serve educational personnel
5. Distributing State-aid funds for the purchase of library materials and processing State-aid library orders
6. Administering the textbook program by distributing funds to school divisions operating free rental textbook systems and coordinating the State program for the adoption of basic textbooks
7. Administering the federal program by acquiring library resources, textbooks, and other instructional materials under Title II of Public Law 89-10
8. Reviewing library layouts for new schools
9. Reviewing new materials submitted by publishers for inclusion on the State-aid library list.

Accomplishments

School Library Development Fund. The School Library Development Fund provides help to localities for the purchase of materials for new school libraries. Established in 1964, the program provides \$60 for every 20 pupils enrolled in eligible schools. During the past school year, grants were made to 53 schools in 34 school

divisions. State funds of \$77,160 were matched with \$38,120 in local funds. Orders totaling \$115,740 were placed with publishers.

Books Reviewed for State List. During 1967, 7,957 books were reviewed by members of the Elementary Materials Committee, the High School Materials Committee, and members of the staff of the Department of Education. More than 100 school librarians assisted in this work. The State Board of Education approved the addition of 4,767 books to the State-aid purchase list.

Professional and Library Collection Available to Educational Personnel. The professional library of the State Department of Education continued to lend materials to school personnel throughout the State and to the staff of the Department. The library was weeded during the year and a number of new books were added to the collection. The library subscribes to 131 magazines of professional interest which are available to staff members of the Department.

Book Exhibits. The School Libraries and Textbooks Service maintains a collection of juvenile books which are approved by the State Board of Education for use in Virginia public schools. These books are available for use by school personnel and portions of the collection are used as exhibits to aid teachers, librarians, and parents in the selection of books for purchase. Exhibits were used in three school divisions during the spring of 1968.

Certified Librarians. During the 1967-1968 school year, Virginia public schools employed 1,020 librarians with teaching certificates endorsed for library science. Of this number, 501 were employed in 428 secondary schools, 480 in 540 elementary schools, 27 in supervisory positions, one in a vocational library, one in a professional library, seven in central processing centers, and three in county libraries.

Savings in State-Aid Funds Through Central Purchasing System. During 1967-1968, quarterly service discounts of \$126,625 were refunded by publishers and dealers to the treasurer of Virginia on State-aid orders totaling \$1,454,264. This amount was converted into \$60 State-aid units, making possible a mid-year allotment of units for additional purchases of library materials.

Free and Rental Textbook Systems. The 1966 General Assembly appropriated funds to be used to reimburse localities providing free or rental textbook systems at the rate of \$2.00 per pupil enrolled in those localities. During the 1967-1968 school year, 23 school divisions operated free textbook systems and 79 divisions operated rental textbook systems as shown below:

FREE TEXTBOOK SYSTEM		RENTAL TEXTBOOK SYSTEM	
<i>Counties and Cities</i>	<i>Grades Included</i>	<i>Counties and Cities</i>	<i>Grades Included</i>
11	1-12	60	1-12
8	1-7	13	1-7
3	1-6	3	7-12
1	1-8	3	8-12

Reimbursement of State funds was made as follows:

\$101,628—for free textbook systems
182,794—for rental textbook systems

\$284,422—Total

Operation of Title II of Public Law 89-10. During 1967-1968, Virginia received \$2,076,058 under Title II of Public Law 89-10 for the acquisition of school library resources, textbooks, and other printed and published instructional materials for the use of children and teachers in public and private elementary and secondary schools. During the year the State Plan and Guidelines for the Administration of Title II Public Law 89-10 were revised. Changes were made for the purpose of (1) providing wider selection opportunities, and (2) bringing the operation of Title II more in line with other federal programs. Major changes were in the areas of selection and ordering giving the responsibility for both to local school divisions. The new guidelines were prepared and distributed.

Demonstration School Libraries Project. Under Title II, Public Law 89-10, nine school libraries throughout the State were selected to serve as exemplary school library programs. A total of \$200,000 was allotted for materials to be added to these libraries. The purpose of the program is to help school personnel and interested citizens, who visit the demonstration schools, through observing effective library programs in action to gain ideas which will improve library services and facilities throughout the State.

Staff Addition. Miss Sandra L. Umberger joined the staff of School Libraries and Textbooks as Assistant Supervisor of School Libraries on February 1, 1968.

DIVISION OF VOCATIONAL EDUCATION

The Division of Vocational Education serves school divisions in developing an effective vocational program as an integral part of the total curriculum in the public schools. The Division has designed programs for persons attending high school; for those already in the labor market who need training and retraining; and for those who have socio-economic or other handicaps which prevent them from participating in the regular vocational program.

A concerted effort is being made to increase the number of teachers in training, and to update the content of the teacher-training programs. Emphasis is also being placed on preparing more teachers for innovative programs, such as educational television, pre-vocational programs, cluster programs for the skilled trades, data processing, joint programs between services, gainful home economics related occupations, and off-farm agricultural related occupations.

Assuring that people are equipped with skills useful in our changing world of work is the continuing challenge faced in vocational education. In the years ahead, it is expected that employers will require more specialized training for a higher percentage of their workers. Greater flexibility in vocational education offerings will provide training for a wider range of occupations in keeping with labor market demands and scientific and technological developments.

Reports of the activities of the Services of the Division of Vocational Education for the fiscal year 1967-68 follow in this order: Vocational Agriculture, Business Education, Distributive Education, Home Economics Education, Industrial Education, Manpower Training, School Lunch, Veterans Education, and Construction of Vocational Facilities.

AGRICULTURAL EDUCATION

The purpose of the Agricultural Education Service is to lead the development and improvement of all phases of vocational education in agriculture, including programs for high school students and young and adult farmer groups. The general aim of these programs is to provide basic instruction for agricultural occupations and to develop agricultural competencies needed by individuals engaged in or preparing to engage in both on-farm and off-farm agricultural occupations. Therefore, the primary function of the Service is to assist school administrators and teachers in developing and improving the instructional program in agricultural education based on the needs of students. Assistance was given by the staff through (a) observation, (b) discussion, (c) on-farm and job instruction, (d) evaluation of local programs, (e) group conferences, (f) in-service training programs, and (g) correspondence and other appropriate means. The staff, in cooperation with teacher education institutions, prepares instructional materials and curriculum guides for use by teachers of vocational agriculture, conducts research, and assists in planning and conducting in-service and teacher education programs.

During the year the staff continued to revise the agricultural education curriculum to meet the demands of today's concept of the total industry of agriculture. Service personnel were organized to develop and refine curriculum guides for a two-year basic course and six options open to third- and fourth-year students. The optional courses include agricultural production, agricultural machinery

service, agricultural supplies, agricultural processing and marketing, conservation and forestry, and ornamental horticulture. Forty-three developmental programs emphasizing one of the five options other than production agriculture were conducted. Further emphasis was given to the placement of students for supervised occupational experience in agriculture, and to the evaluation of local programs in agricultural education.

In 1967-68 the staff provided professional services to 210 high schools in 87 counties and six cities where agricultural education programs were offered. In these schools 14,563 high school students were enrolled in regular agricultural education classes, 3,826 in general mechanics classes, and 426 in classes for students with special needs. In addition, 2,322 out-of-school young farmers were enrolled in 136 young farmer classes, and 5,211 farm men and women were enrolled in 243 evening classes devoted to the discussion of production, conservation, marketing of farm products, and farm-management problems. In adult agricultural mechanics classes, instruction was provided in the selection, operation, preventive maintenance, repair, and construction of farm machinery. During 1967-68, 25,228 persons participated in 66 school community cannery programs devoted to the production and conservation of foods for family consumption. This is a joint activity of the Home Economics and Agricultural Education Services.

During the year the staff, in cooperation with division superintendents, high school principals, and teachers of vocational agriculture, made many improvements in facilities, equipment, and curriculum materials for vocational agriculture. Six schools erected greenhouse facilities for teaching ornamental horticulture. The results of developmental programs and studies conducted last year continued to provide important guidelines for the staff, local school officials, and teachers in continuing their redirection and reorientation of agricultural education to meet the needs of today's rural youth.

In-School Students. High school students enrolled in agricultural education carried out 34,471 supervised practice enterprises and 44,101 supplementary jobs. The 52,737 acres of crops, 46,343 head of livestock, and 1,481,336 fowls carried as enterprises by students yielded a total productive income of \$5,173,881. In addition, 2,066 boys were placed in farm jobs for experience in agricultural occupations.

Future Farmers of America. The staff provided guidance for the Future Farmers of America, a national organization of students studying agricultural education in the high schools. During the year membership in 203 FFA chapters totaled 14,535. More than 1,000 members attended the FFA Convention at Virginia Polytechnic Institute.

The staff, in cooperation with that of Home Economics Education, provided guidance and leadership in conducting the FFA-FHA Camp at Morgart's Beach and the J. R. Thomas Camp, near Petersburg. During the summer of 1967, a total of 1,014 boys and girls attended these camps, which provided leadership training and recreation.

Young Farmer Classes. Young farmers who were enrolled in 136 organized classes farmed 465,255 acres. Of the 2,322 individuals enrolled, 1,219 were land owners. Class members purchased 5,002 acres of land during the year and 323 improved their farming status. The staff provided guidance for the Statewide Young Farmer Convention held in Roanoke in February. At this convention,

held jointly with that of the Young Homemakers of Virginia, approximately 475 young farmers and their wives discussed common problems and made plans to expand and improve the Young Farmer and Young Homemaker training programs. Instruction in all phases of farm management and agricultural mechanics was emphasized during the year. A Statewide series of 10 educational television programs was developed to supplement the instruction for young and adult farmers.

Farm Families. A total of 5,211 adult farmers received an average of 40.2 hours of class instruction in evening classes and an average of two on-farm instruction visits during the year. Members of agricultural mechanics classes also repaired, overhauled, and/or constructed farm equipment.

Participation in the food production and conservation program was promoted by the cooperative efforts of the staff and teachers of agricultural education and home economics. Persons receiving instruction in the preservation of food for family consumption processed in school community canneries the equivalent of 3,545,587 pints of food.

Conferences, Workshops and Other Activities. During the year the Agricultural Education Service assumed leadership in conducting a number of State, area, and group conferences as one means of providing in-service training for agricultural education teachers.

"Evaluation in Agricultural Education" was the theme of a Statewide conference for teachers of agricultural education held at Virginia Polytechnic Institute in July.

The staff led in planning and conducting 116 State, area, and group conferences for agricultural education teachers.

In cooperation with the teacher education staffs at VPI and Virginia State College, the Agricultural Education Service conducted in-service training programs with emphasis on program planning, agricultural mechanics, farm electrification, animal science, forestry, farm management and ornamental horticulture. A series of workshops was held in the area of agricultural mechanics, electricity, small engines, motor analyzing equipment, and crops and livestock selection.

Forty-three schools conducted developmental programs in one of the five options in agriculture other than agricultural production.

Lists of needed curriculum materials and equipment for teaching agricultural education were developed by the staff.

An educational television series of 10 lessons on farm management was developed and telecast to supplement instruction for young and adult farmers.

The staff received an increasing number of requests for assistance in planning agricultural education programs in urban areas.

The staff assisted with the implementation of standards and guidelines for young and adult farmer programs.

In cooperation with guidance and other vocational services the staff participated in a Vocational Guidance Institute for high school counselors and principals.

The staff assisted with a one-week National Seminar at Virginia Polytechnic Institute on Young Farmer Education.

†These are part-time teachers.

13,815 of the 25,228 here shown as enrolled for food conservation were served jointly by agriculture and home economics teachers and are shown also in the Home Economics Education report.

NOTE: Six cities and 87 counties were served by the State program of agricultural education.

BUSINESS EDUCATION

The Business Education Service is concerned with developing (1) the vocational knowledge, skills, and attitudes needed by youth and adults for employment and advancement in business careers; and (2) the knowledge, understanding, and non-vocational skills needed by all persons in everyday contacts with business and economic issues. The major function of the service is to improve instruction in business and office education at the high school, adult and teacher-education levels.

Instructional activities are being revised to more effectively help students understand automation processes and to perform effectively in businesses using data processing procedures. A few large urban high schools offered introductory courses in data processing and 15 high schools offered a data processing curriculum.

Reimbursements from State funds on a matching basis with local funds were used to purchase instructional equipment for vocational business education. One hundred thirty-seven high schools in 72 school divisions participated in these funds, as did two post-high schools and six teacher education institutions.

Business Education Service personnel promote and work actively with the following phases of the school program.

Secondary School Program. During the 1967-68 school year, 1,288 business and office occupations teachers taught business education subjects in 350 high schools, 29 junior high schools, and two schools for the deaf and the blind. There were 476 full-time vocational teaching positions; 122 teachers received salary reimbursement through vocational education funds. There were eight local business education supervisors in the State, including three hired during this year. Of the 350 high schools offering business education, 305 had either reimbursed or reimbursable programs—an increase of six over last year.

Post-High School Programs. The Woodrow Wilson Rehabilitation Center at Fishersville offered vocational office training to 153 students and employed seven teachers. Triplett Business and Technical Institute employed three teachers and enrolled 40 students.

Adult Program. The aim of this program is to prepare beginning office workers and upgrade and retain employed workers. Evening classes for adults were offered on a reimbursed basis in 36 school divisions and one college. The enrollment for 1967-68 in adult education was 10,628 in 541 evening school classes. This was a 66 percent increase in enrollment and a 77 percent increase in class offerings over reports of the previous year. Of these, 4,039 students were enrolled in supplementary classes and 6,587 were in preparatory classes. Many other schools offered adult programs in business subjects on a nonreimbursed basis. The Center for Adult Business Education, a cooperative venture with Virginia Commonwealth University, continues to expand to meet the in-service education needs of many businesses within a 50-mile radius of Richmond.

Vocational Office Training. Vocational Office Training is a cooperative part-time work training program in business education. During the senior year students enrolled in this program are in classes for a half day and are employed in community business offices for part of the day. The qualified business teacher-coordinator is responsible for correlating the learning activities in school and on the job. During the 1967-68 school session, this program was offered in 96 high schools and one college.

The Vocational Office Training program enrolled 1,854 students, whose annual earnings amounted to \$1,773,447, an average of \$1,009 each.

Conferences, Workshops, and Services. The business education staff consists of three full-time supervisors and one part-time supervisor.

An in-service workshop for the benefit of teacher educators, State staff, and local supervisors was held for three days. The purpose was to acquaint staff with multi-period programs in office occupations education.

The Business Education Service, in cooperation with the Educational Television Service, taped a series of 30 half-hour telelessons entitled "Introduction to Data Processing for Business Teachers".

In-service workshops for data processing teachers were held at three State colleges. One of these programs was funded through the National Science Foundation with stipends for the teachers attending.

Five area conferences were held during the year to consider the topic, "The Vocational Aspects of Typewriting". These conferences were sponsored jointly by the State staff and teacher education institutions.

An outstanding conference on teaching youth with special needs was conducted by two State colleges and funded through the Human Resources Center, University of Virginia. Conferences were held for teachers of pilot programs, for teacher educators, for local business education supervisors, and for teachers of youth with special needs. A week-long workshop for new teachers of office procedures was also held. Monthly meetings of VOT coordinators were held in five geographical areas. At the Annual Business Education Conference, 474 VOT coordinators, heads of business departments, data processing teachers, pilot program teachers, and selected business teachers were concerned with the revision of the VOT and data processing courses of study.

Pilot programs in "Office Procedures" were increased from six to 13 during the second year of a three-year project.

Staff members visited more than 116 local schools, analyzed programs, studied enrollment, and determined facility and equipment needs.

The Virginia Chapter of Future Business Leaders of America was sponsored by the Business Education Service. There were 151 chapters with 5,304 members. During the past year there were five regional planning meetings in the fall, six regional spring conferences, one State convention in April, and one leadership training conference in the summer.

A follow-up study of the June 1967 graduates in business education was completed. The table below shows the results of this follow-up:

FOLLOW-UP OF VIRGINIA BUSINESS GRADUATES OF JUNE 1967

1. Total Number of Graduates, June 1967.....	50,104

DISTRIBUTIVE EDUCATION

The staff of the Distributive Education Service assists local school administrators, distributive education teachers, and college personnel in the development of the distributive education program to meet the following goals:

- (1) To prepare high school youth for successful employment and careers in the field of distribution.
- (2) To provide middle-management training programs at the junior college level to meet the need for junior executives and specialty salesmen in retail, wholesale, and service fields.
- (3) To provide a community adult-training program for persons preparing to enter or already engaged in a distributive occupation.
- (4) To provide the undergraduate and graduate teacher education programs to prepare the teachers, supervisors, and other professional workers needed for a rapidly expanding program.

The staff of the Distributive Education Service provided professional services to 180 high schools and five colleges in 52 counties and 29 cities where the distributive education program was in operation. These services included: (1) conferences with school administrators, (2) individual visits with teachers, (3) cluster meetings of teachers, (4) in-service workshops and conferences, (5) participation in local preschool conferences, and (6) evaluation of programs.

In all local contacts this past year, major emphasis was placed on the improvement of program standards in the following areas: pupil-teacher ratio in the expanding high school program; techniques for effective supervision and coordination of on-the-job training for high school and post-high school enrollees; effective guidance techniques for the new preparatory phase of the high school program; expansion of preparatory training now available through the adult program for out-of-school youth and adults; and adequate classroom facilities and equipment for teaching distributive education.

As a result of these staff activities considerable improvements were made during the year in program standards, facilities, equipment, and quality of instruction in distributive education. The program was expanded to serve many more youth and adults desiring training to enable them to function more effectively in this phase of the State's economy.

Highlights of progress in these areas are summarized below.

Program Development in Keeping With Current Needs

1. Enrollments in the distributive education high school program increased to 10,592 students from 8,936 for the previous year, an 18.5 percent increase for the year. The number of high schools offering distributive education increased from 166 to 180. Occupational fields for which the largest numbers of students were trained included department and variety stores (4,352); food distribution (1,111); automotive and service stations (606); apparel stores (630); and food service (434).

The annual follow-up study of 1966-67 DE graduates showed that 89 percent are employed in the area of distribution for which they were trained. The study further showed that only 3.4 percent of the students are unemployed.

2. The new tenth grade distributive education preparatory course is now offered in 152 of the 180 high schools having a DE program. Eighteen high schools offered the course for the first time this year. Offering only the DE preparatory course in new high school programs has proven most effective; one year of preparation for students also allows the coordinator time to develop quality training stations and a good attitude among merchants for future development of the cooperative phase.
3. Five new distributive education departments were equipped and new or replacement equipment was purchased for 63 additional high school DE programs.
4. One hundred and fifty-eight schools in 73 school divisions and two junior colleges enrolled 36,041 adults in more than 1,000 preparatory and supplementary classes for distributive occupations taught by 187 DE teachers and 192 part-time instructors from business and industry. Of these, 23,085 persons were enrolled in classes to upgrade them on the job and 9,826 were in preparatory classes. The total enrollment exceeded the yearly projection by more than 6,000.

Several occupational areas received special emphasis this year: (1) Enrollments in classes for the real estate field and the travel industry more than doubled. (2) Pilot programs in three centers offered specialized training programs for the hardware field. (3) A specialized diploma program in personnel management consisting of 150 hours of instruction was inaugurated in three centers. (4) In answer to the increasing shoplifting problem which merchants face, coordinators in almost every community having a DE program offered the special Shoplifting Prevention Clinic which is available through the DE adult program.

To meet the increasing demand for business specialists to serve as part-time instructors of distributive adult classes, special two-day seminars were conducted in five centers to present teaching methods and materials for approximately 100 prospective instructors. The basis for these seminars was a new Handbook for Adult Instructors that was developed during the year.

5. Enrollments in distributive education post-secondary programs increased to 444, an almost 100 percent increase over the previous year. One new program offering the associate degree in cooperative distribution was established at the Northern Virginia Community College.

Training for Rural Youth

Since 1966 distributive education courses to prepare rural youth for employment in distribution have been established in 12 high schools located in nine rural counties in Virginia without previous DE programs. This has been provided through the new one-year preparatory course in distributive education which substitutes projects and participating experiences for on-the-job training to give students the necessary preparation for successful entry into a distributive job following graduation.

A close evaluation of these programs was made this year and recommended improvements in curriculum content, use of school and community resources, and guidance procedures will be shared with all school divisions involved.

Programs for Persons With Special Needs

Distributive education programs to prepare persons with special needs for distributive occupations are constantly being expanded and improved. Total enrollment in the "Education for Employment" course which was offered for potential drop-outs in three junior high schools increased to 75 students this year. A three-year follow-up study of the course showed that 68 percent of the students enrolled have remained in school and graduated. Of this number, 41 percent have enrolled in the regular DE high school program for one or more years. Two additional school divisions are planning to offer the course next year in two senior high schools and in one junior high school.

Distributive education adult classes for persons with special needs were greatly expanded from 13 classes with enrollments of 332 last year to 28 classes with enrollments of 3,130 this year.

Distributive Education Clubs of America

The Virginia Association of the Distributive Education Clubs of America is the professional youth organization of students enrolled in secondary and post-secondary distributive education programs. During the 1967-68 school year 180 local chapters of the Virginia Association had a total membership of 9,467.

Virginia DECA received national recognition with the election of students to two national offices—Southern Regional Vice-President of the Post-Secondary Division and National Executive Vice-President of the High School Division. The Virginia DECA female entry in the DE Student of the Year Contest placed third in the nation.

Research and Curriculum Development

The most significant progress made in curriculum development in Distributive Education was achieved through seven regional curriculum workshops, where more than 100 distributive education coordinators participated in developing content and teaching materials for four new units of study in the DE advanced cooperative program. These included merchandising math, sales promotion, credit principles and practices, and trends in distribution. The development of these units is a part of the process under way to upgrade this third-year phase of distributive education which is needed now that distributive education starts at the tenth grade level. The workshops were directed by the DE research consultant at Virginia Commonwealth University in cooperation with members of the State DE staff. During this past summer nine local DE coordinators were employed for one month to assist the research consultant in the completion of these units for distribution to each school division.

A highly significant national research study in distributive education is currently being directed by Mrs. Lucy C. Crawford, teacher educator at Virginia Polytechnic Institute. Entitled "A Competency Pattern Approach to Curriculum Construction in Distributive Teacher Education," the research was begun in September 1965 and is funded under Section 4-c of the 1963 Vocational Education Act. The first two phases of the research identified the 96 basic beliefs in distributive education accepted by the leadership

across the nation, critical tasks of the DE coordinator, professional and technical competencies needed to perform the tasks, and educational objectives. A feature of the third phase of the study was a national Dissemination and Interpretation Seminar in Distributive Teacher Education Development held at VPI in August 1968 for teacher educators from 35 states. The final phase of the research will be to construct a curriculum theory design for distributive teacher education which could serve as a model throughout the nation.

Teacher Education and Professional Development

1. Teacher education programs at Virginia Commonwealth University and Virginia Polytechnic Institute constitute one of the largest State programs in the nation, with a total enrollment this past year of 162 undergraduate students pursuing the bachelor of science degree in distributive education, 77 at VCU and 85 at VPI. In the spring 44 senior students from the two colleges participated in the distributive education student teaching program in 23 local school divisions. Of this number 27 have accepted high school DE teaching positions in the State, and one will teach in the post-secondary DE program. One other graduate accepted a teaching position in another field in the State and two have accepted out-of-state positions.

During fiscal 1968 VPI and VCU offered 26 different in-service graduate and undergraduate courses for distributive education personnel who were pursuing graduate study, working toward certification, or renewing certificates. Enrollments in these classes totaled 253. In the distributive education graduate program at VCU 64 DE coordinators were enrolled in part-time graduate study. At VPI five DE coordinators received their master's degree in vocational education.

2. The teacher educators at VCU and VPI, in cooperation with the distributive education State supervisory staff, conducted four in-service workshops for DE teachers during the year for upgrading and refresher training in teaching methods and materials, the project method of instruction, and guidance.
3. In-service workshops conducted by members of the State supervisory staff were attended by 218 DE coordinators, adult instructors, and local supervisors.
4. Twelve distributive education teacher-coordinators served as members of evaluation teams which visited certain high schools to evaluate the total school program.

TABLE 23—SUMMARY OF WORK IN DISTRIBUTIVE EDUCATION—1957-1968

SESSION	IN-SCHOOL				OUT-OF-SCHOOL			Total Enrollment

HOME ECONOMICS

The staff of the Home Economics Education Service serves secondary school administrators and home economics teachers in the development of a program which has these goals: preparation for the vocation of homemaking; preparation for employment in occupations using home economics knowledge and skills; and motivation of students with scholastic and leadership abilities to pursue college education in preparation for professional careers in home economics.

The staff works cooperatively with Virginia colleges in the pre-service education of students who are preparing to teach home economics.

Scope of Program. In 1967-68, home economics education programs operated in each of the State's 121 school divisions, which include 96 counties and 35 cities. In these divisions 487 high schools offered home economics programs under the direction of 820 teachers. Enrollment in all home economics courses totaled 76,062 pupils, including 49,577 in regular home economics classes (grades eight-twelve); 678 in home economics-related employment courses; 1,409 in homemaking courses for students with special needs; and 429 in occupationally oriented courses for students with special needs. In addition, 1,436 seventh-grade students were enrolled in homemaking classes for a full year, and 22,533 seventh and eighth-graders received instruction in homemaking for less than a full year.

The Home Economics Service reached 20,023 out-of-school youth and adults in various programs: 5,203 were enrolled in organized homemaking classes for adults; 703 received instruction in homemaking through Young Homemakers of Virginia; 89 adults were enrolled in home economics-related employment courses; and 213 adults received instruction in other home economics classes which are preparatory for enrolling in employment courses. A total of 13,815 adults participated in food production and conservation classes. This phase of the program is conducted in cooperation with the Agricultural Education Service.

Improvement of Instruction. Supervisory personnel visited 281 schools and worked with 505 teachers to review teachers' work plans for the year, to observe units of instruction being taught, to determine strengths and weaknesses in the program, and to make suggestions and recommendations for improvement of local programs.

Staff members participated with local administrators and teachers in 183 group meetings to discuss program offerings and the scheduling of courses in homemaking (useful occupations) and in gainful occupations using home economics knowledge and skills.

In cooperation with school administrators, the State staff served on evaluation committees which studied 76 secondary school home economics programs.

Three workshops were conducted to aid 71 teachers who were developing employment courses as a part of local home economics programs.

A Statewide in-service education conference was held for the purpose of assisting home economics teachers to plan programs for the year ahead and to determine ways of improving instruction. The conference program was centered on promoting and developing home economics courses for employment; working with persons with special needs; working with other groups in the school and community; and improving instruction in homemaking for youth and adults.

Development of Curriculum Materials. The supervisory staff and teachers continued work toward a major revision of the curriculum guide for the home-

making phase of the home economics program. This is moving toward completion.

To aid in the development of the gainful occupations phase of the program, curriculum materials in foods, clothing, and homemaker's assistant services have been prepared and made available to teachers in schools offering these courses. Presently, a curriculum guide for use in training child care workers is being prepared. Materials have been distributed and revised as needed.

Youth Organization, Future Homemakers of America. Staff members planned and directed a Statewide leadership training meeting which was attended by 525 representatives and advisers of the youth organization, Virginia Association, Future Homemakers of America. This organization, with a membership of 18,315 persons in 366 chapters, is designed to enrich and supplement classroom instruction. Its membership is made up of students who are enrolled, or have been enrolled, in the home economics program. Three area workshops were held for home economics teachers in which 144 teachers participated. The purpose of the workshops was to assist teachers in strengthening the work of Future Homemakers of America chapters.

Instruction for Adults. The staff worked with local school administrators and teachers to develop instructional programs in homemaking for adults and members of Young Homemakers of Virginia.

These courses included instruction in clothing selection and construction, meal planning and preparation, child development, home management, and consumer education. Primarily, they were taught by a regular home economics teacher as a part of the total program; however, in situations where the in-school enrollment was too heavy to make this possible, part-time teachers were employed.

Gainful occupation courses which prepare adults for work as homemaker's assistants were taught in Norfolk and Roanoke. Other classes prepared adults for entering and advancing in clothing service and food service occupations.

Instruction for Pupils with Special Needs. Courses in home economics were provided for 1,838 students with special needs who were not functioning effectively in the regular school program. These courses contributed to holding potential dropouts in school and to making them better homemakers and wage-earners.

Improvement of Space and Facilities. Assistance was given to school divisions in planning 19 new and remodeled departments and in setting standards for purchasing equipment.

Staff members helped 47 schools prepare budgets and select equipment. Instructional equipment was placed in 64 schools and facilities for instruction in home economics-related employment courses were improved in 12 schools.

Cooperative Work with Other Services and Divisions. Staff members participated in a Statewide vocational guidance summer institute which was held to acquaint high school guidance counselors with opportunities and offerings in all fields of vocational education. Pertinent interpretative materials about the home economics education program were distributed to 298 guidance counselors who attended the institute.

In cooperation with the Bureau of Teaching Materials, new home economics reference books were reviewed and evaluated and lists of recommended books were made available to local school administrators and teachers.

Plans for new home economics departments were reviewed in cooperation with the School Buildings Service, and recommendations for revisions were made to provide optimum facilities for instruction.

Cooperative Work with Colleges on Preparation of Home Economics Teachers.

Heads of home economics departments and teacher educators from eight Virginia colleges approved for the preparation of home economics teachers met twice during the year with members of the State staff to discuss new developments and progress being made in the home economics program. Special emphasis was placed on the preparation of home economics teachers who will offer high school courses for employment as well as courses in homemaking.

As a result of these meetings each college agreed to analyze its teacher-education program and to find ways of incorporating experiences to aid pre-service teachers in preparing to teach employment courses. Also, a committee was appointed to receive and compile procedures to be used by each college. The procedures include the following:

Discuss the purposes of home economics courses for employment and review curriculum materials for such courses.

Wherever possible, place student teachers in schools where the home economics program includes courses for employment as well as courses in preparation for the vocation of homemaking.

Assist home economics education majors to plan individual summer work experience programs in occupations using home economics knowledge and skills.

Guide home economics education majors to use their electives to gain depth in home economics subject areas in which they are especially interested and in which there are employment opportunities.

Plan courses at the college level to prepare teachers for offering home economics courses for employment.

The assistant supervisors of Home Economics Education visited colleges in their respective areas and met with home economics education majors to discuss the program being developed in secondary schools.

INDUSTRIAL EDUCATION

The Industrial Education Service provides leadership for improvement of vocational-industrial and industrial arts instruction.

The industrial education program includes instruction in industrial arts and trade and industrial, and for health and technical occupations. It provides occupational training of a preparatory and supplementary nature through the vocational-industrial programs, as well as general education through industrial arts. Preparatory programs also are provided for youth with special social, economic, or academic needs.

Preparatory Programs

Trade and Industrial (T and I) Occupations

Preparatory programs were provided for students in grades nine through twelve who had made an occupational choice and were pursuing comprehensive high school training leading to entrance level employment. These programs provided foundations for the skilled crafts and service trades such as carpentry, auto mechanics, drafting, electrical trades, cosmetology, and machine shop. Trade classes were taught by 255 teachers in 121 secondary schools.

Part-time Cooperative (Industrial Cooperative Training) programs were conducted for high school juniors and seniors who were 16 years of age or older. These students attended school half of each day and received on-the-job work experience in their chosen occupation the other half of the day. Systematic training was given on the job and supplementary instruction which related to the training was given in the high school. Part-time Industrial Cooperative Training classes were taught by 89 teachers in 87 schools.

Post-secondary preparatory programs were provided for persons who had graduated from, or had otherwise left, high school and were pursuing training on a full-time basis. The scope and content of these programs were the same as for secondary programs, but were in greater depth due to the additional hours provided by full-time study. Post-secondary T and I preparatory classes were taught by 61 teachers in five schools.

Adult preparatory classes were provided on a part-time basis, usually during evening hours, for persons preparing to enter an occupation. Short-term, full-time classes were conducted in certain localities to provide skills useful in local industries. Adult T and I preparatory classes were taught by 40 teachers in 30 schools.

Health Occupations

Secondary preparatory classes which consisted of pre-clinical instruction leading to a license for practical nursing were conducted for qualified seniors in 20 secondary schools by 20 teachers. Medical assistant, health aid and nurses aid classes were held in three secondary schools by three instructors.

Post-secondary preparatory classes which consisted of clinical instruction were provided for the practical nursing students who had satisfactorily completed the pre-clinical phase of this program. Post-secondary pre-clinical and clinical classes were held for other practical nursing students. Thirty-six programs were conducted by 82 teachers. Programs for certified laboratory assistants, medical transcriptionists, X-ray technologists, dental hygienists, dental technology, operating room technique, and nurses aid were also conducted in 11 schools by 11 instructors.

Technical Occupations

Secondary preparatory programs were conducted in several high schools for students in the eleventh and twelfth grades who desired employment as highly skilled technicians. For such students one or more years of post-secondary training is recommended. The curricula were designed with emphasis on the application of mathematics and science in technical problem solving. The technology of electronics was taught by four teachers in three schools.

Post-secondary preparatory programs were conducted for persons who had completed high school and were in full-time attendance at a post-secondary institution. The curricula and purpose of these classes were the same as those for secondary programs, but were much greater in depth. The classes included the technologies of drafting and design, air conditioning and refrigeration, civil and highway design and construction, electronics, and dental technology. Post-secondary technical classes were conducted by 37 teachers in two schools.

Adult preparatory technical classes were conducted on a part-time basis during evening hours for persons preparing to enter some phase of technical work. Twenty teachers at four schools conducted classes in the technologies of civil and highway design, drafting and design, and electronics.

Youth with Special Needs

These programs were conducted in the intermediate and secondary schools for youth who, due to social, economic, or academic handicaps, had made poor adjustments while in school. The purpose of these programs was two-fold: (1) to provide a means for a student with special needs to learn an occupational skill in accordance with his abilities and to become employable upon leaving school, or (2) to provide opportunities for the student to make sufficient adjustments and to acquire sufficient knowledge to enable him to re-enter regular school programs. Special needs programs were conducted by 46 teachers in 41 schools.

Supplementary Programs

Supplementary programs are designed for employed adults who wish to supplement or upgrade their skills and knowledge in the trade, health, or technical occupation in which they engage, or have been engaged. The following types of supplementary classes were conducted on a part-time basis by 783 instructors in 237 schools:

Trade—to upgrade skilled craftsmen in their occupational field.

Technical—to update or upgrade technicians in their technical field.

Health Occupations—to improve nursing care. Courses were offered in medications, anatomy, pediatrics, certified companion, prenatal care, and diversional activities.

Supervisory Personnel Development—to upgrade firemen, supervisors, and other minor executives by increasing their supervisory, teaching, or managerial abilities.

Safety Training for Employees of Electric Cooperatives—to offer on-the-job safety instruction throughout the year.

Apprentice Training—to provide related instruction either in regular unit classes or via a group study plan.

Public Service—to improve technical skills to public service employees, including firemen, policemen, and surveyors.

Industrial Arts

The industrial arts classes were conducted as general education to provide opportunities for students to study and use tools, machinery, and experimental equipment with emphasis on their application to materials, processes, products, and problems of American industry and technology.

Industrial arts was taught by 699 teachers and was offered in 335 secondary schools in grades seven through twelve. Additional industrial arts courses were offered in many school divisions to post-high school youths and adults on an avocational basis. Activities included woodworking, metalworking, drawing, electricity/electronics, plastics, ceramics, graphic arts, leather, and power mechanics.

Summary of Additional Activities

Expansion of vocational preparatory and industrial arts programs during 1967-68 resulted in the addition of 139 teachers in 94 new or expanded programs. Several new local advisory committees were organized during the year.

The staff of the Industrial Education Service worked with several teams in conducting community surveys to determine the need for industrial education, and also with a number of committees in evaluating the local industrial education programs.

Statewide conferences were conducted for industrial education personnel. Several curriculum workshops and two workshops for the purpose of establishing criteria for evaluating industrial education programs were held.

Three regional and one State leadership conferences were held for the industrial education youth group, the Vocational Industrial Clubs of America.

Additional conferences included two for local supervisors and principals of area vocational schools, seven area workshops for ICT Coordinators, three area conferences for apprentice coordinators, and several preschool workshops for teachers. The Service was also represented by staff members at a number of regional and national conferences and institutes devoted to various phases of industrial education.

One member of the staff served on the Governor's Commission for the Aged.

The following bulletins, brochures, and guides were developed or revised by the Industrial Education Service: TIES (five issues); Follow-Up Report of ICT, Trade, and Technical Graduates; Annual Statistical Report for Industrial Education; Industrial Education Directory; Listing of Industrial Education Library Materials; Industrial Arts Brochure; Evaluative Criteria for Industrial Arts; Evaluative Criteria for Vocational Industrial Education Programs; Curriculum Guide for Printing; Revision of Advanced Training Course for Firemen.

MANPOWER TRAINING SERVICE

In accordance with the policies of the State Board of Education in cooperation with the Virginia Employment Commission, the Manpower Training Service is responsible for providing training in occupational categories for unemployed and underemployed youth and adults within the State who qualify under provisions of the Manpower Development and Training Act of 1962, including the Amendments to the Act in 1963 and 1965. These amendments provide for basic educational training and counseling services for individuals who are excluded from occupational training because of an inadequate educational achievement level. The Act as amended also provides for refresher or other training for individuals who have become unemployed because of the specialized nature of their previous employment, or who are in need of specialized skills for advancement.

Basically, the purpose of the Manpower Development and Training program is to relieve unemployment caused by automation, shifts in market demands, employment trends, and other economic changes. The program does not replace the need for existing vocational training but expands and broadens the training programs available for workers in all occupations.

Staff members of the Manpower Training Service work with school divisions in their localities to achieve certain objectives. These include providing assistance in organizing curriculum guides and course outlines; developing standards of occupational competency; preparing budgets for each proposed training program and reviewing upon completion; providing courses in instruction based on the recognized needs of individuals who are to receive training; periodically reviewing and evaluating training programs, including recommendations for improvement and the need for continuing the training; initiating steps to assure that training projects are formulated without delay; maintaining consistent quality and adequacy in the available training; and following-up all trainees who complete the program to help insure their success in the occupations for which they have prepared.

During the school year 1967-68, 72 Manpower Training programs were planned, budgeted, and approved for training 2,068 individuals in Virginia. Training was provided in 29 occupational areas and programs were operated in

24 school divisions. The length of the programs varied from eight to 100 weeks, depending on the occupational area.

Programs starting during the 1967-1968 school year and those continuing from the 1966-1967 school year total 112 with an enrollment of 2,827.

Trainee graduates of Manpower Development and Training Programs numbered 1,351 during the 1967-1968 school year.

Five multiple centers for school dropouts were in operation, providing job-oriented basic education, orientation to the world of work, and occupational training. Job-oriented basic education was provided for persons who dropped out of school before completing the sixth grade. Guidance, counseling, and testing services were provided as an integral part of each center.

A pilot program with national implications was developed cooperatively with the Federal Bureau of Apprenticeship and Training, the Virginia Employment Commission, and the Virginia Office of Economic Opportunity. This program, started late in the spring of 1967 and continued during the 1967-1968 school year, provides basic education to on-the-job trainees selected by the Virginia Office of Economic Opportunity through an agreement with local Community Action Committees. A maximum of 12 weeks of basic education was provided for those on-the-job trainees needing special help in getting a job and functioning satisfactorily after employment. The curriculum was based on individual needs for basic education and orientation to the world of work and citizenship.

Based on criteria from the U. S. Office of Education, proposals were formulated for the official designation of four Manpower Training centers as Area Manpower Skill Training Centers. These centers will have their own identity and will provide all services needed by the unemployed and underemployed youth and adults for employment. They will have a permanency not experienced by present Manpower Training programs or centers.

Accomplishments

Nine sessions for review and approval of projects were held in cooperation with the representatives of the Virginia Employment Commission; the Bureau of Employment Security, U. S. Department of Labor; and the U. S. Office of Education, Department of Health, Education and Welfare.

The Service, which held 68 planning conferences with representatives of local school boards and local employment office managers, cooperated with business and industry in planning training commensurate with their needs and the needs of available trainees.

Manpower Training personnel attended two regional conferences on Manpower Development and Training, presented the Manpower Training program at one vocational guidance institute, conducted two conferences and workshops for local Manpower Training supervisors, and conducted a five-day in-service teacher training workshop for Manpower Training instructors.

The Service represented the State CAMPS Coordinating Committee at the regional review of the Virginia Cooperative Area Manpower plan for human resources development in Virginia; served as a member of the Virginia Manpower Coordinating Committee working to coordinate the manpower services available through the various governmental agencies as set forth by the Cooperative Area Manpower Planning System (CAMPS); and represented the Virginia Manpower Training Service at the AVA Convention, Cleveland, Ohio.

SCHOOL LUNCH

The Food Service program in the public schools is recognized as an extension and enrichment of the educational curriculum. Opportunities have been provided through health education, home economics education, mathematics, science, and social studies to help make school food service a living experience which provides an educational laboratory for correlating the teaching of good nutrition, citizenship and other factors. Understanding its educational value has led to the correlation of the school food service program with the total school curriculum.

Staff members who are responsible for leading and assisting school divisions in the development of the school food service programs work as follows: (a) to

assist in planning and developing school food operations; (b) to aid in administering and evaluating programs; (c) to conduct workshops and conferences for the professional improvement of school food service personnel; (d) to initiate study groups for work on improving standards of operation; (e) to review school building plans to help determine adequacy of food service facilities; (f) to prepare, review, and distribute new materials and to interpret materials previously distributed to school food service personnel; and (g) to encourage the development of the educational aspects of the program.

The supervisory personnel held conferences with 1,212 division superintendents and other school administrators; visited 949 schools once and 43 schools more than once; and held conferences with 1,075 school lunch personnel, teachers, and others.

During the 1967-68 school session 1,763 schools served lunches to an average of 526,666 pupils daily and milk to many more pupils. The total expenditure for the operational cost of school food service and special milk programs in Virginia public schools for the 1967-68 session was \$39,938,910.

National School Lunch Program

A total of 1,755 schools were approved for participation in the national school lunch program and received a food reimbursement of \$4,472,189 for 92,950,104 lunches. These funds were used to serve lunches to a daily average of 520,351 pupils. The highest average daily participation (537,040) was in May 1968; the lowest average participation (511,133) was in March 1968.

The average number of pupils eating lunch daily increased by 24,946 (five percent) over 1966-67 in schools using funds provided by the national school lunch program.

The average number of pupils served daily represented 55.3 percent of the enrollment of the State.

Evaluations which were made in 660 schools revealed the strengths and weaknesses of the programs. The evaluations included a study of meal adequacy, sanitation, participation, records, and other phases of operation. A study of these evaluations revealed evidences of improved quality and quantity of the lunches served. Many follow-up studies noted improvement in the various phases of operation.

Special Milk Program

A total of 1,752 schools participated in the special milk program. Of this number 1,717 schools served lunches and provided additional milk on which reimbursement was paid; 35 schools only offered milk, due to the lack of serving facilities or non-participation in the national school lunch program. Under the special milk program 47,882,241 half pints of milk were served in addition to those served with complete lunches. The schools were reimbursed \$1,641,172 on the purchase price of the milk, thus reducing the price of the milk to the pupil. Total half pints of milk served with the lunches and sold extra increased by 4,369,806 (3.2 percent).

Breakfast Programs

Sixty-three schools participated in a breakfast program. Of that number, 37 schools served breakfast under the Child Nutrition Act of 1966, which provided a total of 499,472 breakfasts to an average of 3,027 pupils daily. The 37 schools received \$72,872 from federal funds.

Twenty-four programs were evaluated for adequacy of the breakfast, preparation and serving practices, acceptance by pupils, and noticeable pupil improvement.

Nonfood Assistance

Twenty schools in 15 divisions participated in the Nonfood Assistance Program under the Child Nutrition Act of 1966. These schools represented an average daily attendance of 6,719 pupils. The criteria for participation included schools whose cafeteria funds were such that needed equipment could not be purchased and whose local school board would agree to assume a minimum of 25 percent of the purchase price and installation of the equipment. Federal funds received by the schools amounted to \$21,098—which represented a maximum of 75 percent of the total cost. Additional equipment was placed in two schools which had received equipment the previous year and 18 other schools were recipients. Enrollments in these schools represent many families in low income brackets.

This equipment has provided the necessary facilities for several schools to participate in the breakfast program. In all schools more foods have been prepared. The result has been an improved financial status and an increased pupil participation.

Training Program for Personnel

Seven area conferences were held during the summer months with a total of 525 enrolled. The local and State staffs conducted 37 training meetings with 1,223 persons attending. Eighteen meetings were held in which 271 parents, teachers, administrators, and school lunch personnel participated. The 32 school divisions (15 counties and 17 cities) having local supervisors gave increased emphasis to personnel training, which resulted in more adequately trained personnel for new positions and better operating procedures. A two-day conference was jointly planned and conducted by local and State school lunch supervisors.

Improvement of Space and Facilities

Twenty-six floor plans for new and remodeled kitchens have been reviewed. Assistance has been given in long-range plans for the purchase of new equipment. Emphasis has been placed on adequate specifications and the availability of convection ovens and compartment steamers. The staff and the State Department of Health work closely in assuring that sanitation requirements are maintained.

TABLE 27—SUMMARY OF SCHOOL LUNCH PROGRAM—1965-1968

SESSION	SCHOOLS HAVING LUNCH PROGRAMS	SCHOOLS USING FEDERAL AID		AVERAGE NUMBER PUPILS SERVED DAILY		
		National School Lunch	Special Milk Only	Free or Partially Paid	Paid	Total

VETERANS EDUCATION

The State Department of Education is the approving agency for institutions desiring to provide education and training for eligible persons under the provisions of Title 38, United States Code. The eligible persons are veterans who may receive financial assistance under the provisions of the Veterans Readjustment Benefits Act of 1966, war orphans, and dependents of seriously handicapped veterans.

The Committee on Veterans Education has established policies to be followed by the Executive Officer of the Committee in carrying out the provisions of the law in accordance with fundamental principles of education. The agency approves only such institutions and courses which will offer a sound program of education and training.

The following types of institutions are approved: Virginia institutions of higher education accredited by the State Board of Education; secondary schools accredited by the State Board of Education; public and private vocational schools; hospitals approved by the Council of Medical Education; and hospitals of The American Medical Association.

Private vocational schools must meet approval requirements established by the Department's Division of Vocational Education and must have had at least two years' successful operation as a school within the State before approval can be given for veterans training.

During the year the Committee received 243 applications for approval of courses from institutions in the State which were handled as follows: 194 approvals, 45 disapprovals, and four not processed by July 1, 1968.

The following changes were made during the year in the number of approved institutions: 141 institutions approved as of July 1, 1967; 73 institutions approved during the year; and 208 institutions approved as of June 30, 1968. The approvals for six institutions were withdrawn during the year.

There were 295 visits made to public, non-profit, and proprietary institutions in the State. These visits were made to ensure that the requirements of the Law were being met, to inspect for approval, and upon the request of the Veterans Administration.

On October 1, 1967, Public Law 90-77 became effective. This Law made provisions for veterans to receive benefits while pursuing a course of commercial flight instruction, apprenticeship, and on-the-job training.

The Committee received 163 applications from establishments requesting approval to train veterans on the job which were handled as follows: 152 approvals, 8 disapprovals, and three not processed by July 1, 1968.

There were 59 visits made to establishments to inspect for approval and to determine if the requirements of the Law were being followed.

CONSTRUCTION OF VOCATIONAL FACILITIES

Construction of vocational education facilities in four school divisions was started during the 1964-65 school year with funds available under the Vocational Education Act of 1963.

The Act describes an area vocational school as one which offers five or more occupational programs for full-time students. To be eligible for aid, a construction project must provide facilities for five or more occupational offerings which will

be housed in one school. Such a facility can be the vocational department of a comprehensive high school, a separate vocational education center serving the students from one or more high schools, or a school offering post-secondary vocational and technical training.

These vocational facilities should be available after school hours for classes for persons who have already entered the labor market and who need training or retraining to achieve stability or advancement in employment.

Also, these construction projects may include vocational facilities for youth who are potential dropouts and who are not able to compete in regular vocational programs on the junior and senior year levels.

National and local studies show that the majority of high school students enter the labor market when they leave high school as dropouts or as graduates. To be prepared to compete for available jobs, it is important that these young people have the opportunity to secure vocational training in high school.

The vocational staff assists local school administrators in planning job opportunities and student interest surveys to secure information used to select the occupational training programs to be housed in a proposed building; assists in determining the space requirements for each training program; reviews the equipment arrangements that are developed by the architect; and works cooperatively with the School Buildings Service in evaluating the functional aspects of building plans and specifications.

During the 1967-68 school year the vocational staff assisted four counties in the Appalachian area in the planning of vocational buildings which were approved and funded under the Appalachian Act. These four projects are estimated to cost about \$2,800,000.

DIVISION OF EDUCATIONAL RESEARCH AND STATISTICS

The activities of the Division of Educational Research and Statistics during 1967-68 are summarized below under the four functions of the Division.

Function 1: To Conduct Research Studies Requested by the State Board of Education and the State Superintendent of Public Instruction.

The following studies were in progress during the 1967-68 session:

ACCEPTABLE AND DESIRABLE USES OF THE NATIONAL TEACHER EXAMINATIONS AND OTHER TEACHER BEHAVIOR MEASUREMENTS IN VIRGINIA. In accordance with the State Board of Education's request at its August, 1966, meeting, a Certification Study Committee assessed the National Teacher Examinations (NTE) and their use in several states and in some city and county school systems in Virginia. The Committee's recommendation to the State Board as to "consider conducting pilot studies and research to determine desirable and acceptable uses of the NTE in Virginia. In conducting such studies, consideration should be given to other objective instruments of this nature." The State Board approved the Committee's recommendation and the Division of Educational Research was assigned the responsibility for designing and conducting the study.

Twenty city and county school systems were selected according to stratified random sampling techniques. The six categories which were used for selection were determined by student enrollment according to small urban, medium urban, large urban, small rural, medium rural, and large rural. A total of 464 teachers, new to each system, was selected and the superintendents were notified of the teachers who were selected from their system. The superintendents obtained the agreement of 337 of the randomly selected teachers to participate in the study.

Six instruments were selected to aid in this evaluation:

1. National Teacher Examinations (NTE)
Commons and one Teaching Area Examination
2. Graduate Record Examinations (GRE)
Aptitude Test and one Advanced Test
3. Miller Analogies Test (MAT)
4. Minnesota Teacher Attitude Inventory (MTAI)
5. A socio-economic survey
6. A rating of teachers by principals and by supervisors.

The NTE and GRE were administered in April on the campuses of several colleges and universities according to the established schedule for the colleges and universities. The State Department of Education was designated a Controlled Testing Center for the MAT. The MAT and the other instruments were administered by the staff of the Division of Educational Research in the localities of the selected teachers. Other information about the teachers was obtained from certificate files.

The testing was completed during the spring and the analysis should be completed by November, 1968.

A STUDY OF EDUCATIONAL AND OCCUPATIONAL ASPIRATIONS OF VIRGINIA'S 1966-67 HIGH SCHOOL SENIORS. At a conference on education called by the Governor of Virginia in the fall of 1966, and followed in the winter and spring of 1967 by 10 regional conferences on education, concern was expressed about the low percentage of Virginia's college-age population which was enrolled in college. The figures cited in these conferences were taken from a Southern Regional Education Board publication which indicated that 27.1 percent of Virginia's college-age population was enrolled in college in 1965, whereas the percentage for the South as a whole was 35.1 percent and the U. S. average was 47.1 percent.

This concern of the people, coupled with the desire of the State Department of Education to know more about future plans of seniors and the factors influencing these plans, became the basis for planning a survey. The State Superintendent of Public Instruction discussed these concerns with the Director of the Division of Educational Research and, at the request of the State Superintendent of Public Instruction, the staff of the Division of Educational Research began to develop the procedures and forms needed for the survey.

The Division of Educational Research requested that all high school seniors in Virginia complete a survey form in May, 1967. This form was designed with assistance from staff members from different divisions of the Department and specialists from the Educational Testing Service.

A preliminary analysis of data from 49,466 public high school seniors has been completed and was reported in the Fall, 1967, issue of *Public Education in Virginia*. Replies were received from 347 (98.9 percent) of the 351 public high schools and 62 (95.4 percent) of the 65 accredited private high schools. The 52,620 students from whom data were collected represented approximately 95 percent of the State's public and private high school senior population as of May, 1967.

Phase II, a more detailed statistical analysis, is to be completed in 1968. There is a need for a more comprehensive analysis of the data from all students in order that information of a generalized nature might be obtained regarding the reasons why seniors choose to go to college, the reasons why certain types of colleges are selected, and the reasons why certain vocations are selected by those seniors not choosing to continue their formal education.

This second phase of the analysis required more staff time than was presently available to the Division of Educational Research. In February, 1968, a grant was accepted from the College Entrance Examinations Board (CEEB) to employ resource personnel to assist the Division of Educational Research in (1) determining precisely what questions should be asked of the data, (2) organizing the data for computer analysis, (3) completing the computer analysis, and (4) preparing a publication giving the results of the further statistical analyses. Following are examples of questions requiring further statistical analysis:

1. Are plans after graduation related to the socio-economic level of parents?
2. Does the time at which the student finalized post-high school plans influence the decision whether or not to proceed with a formal post-high school education program?
3. Do students aspire to higher occupational and educational levels than held by their parents? More so in urban areas than in rural areas?

The number of questions which could be asked is quite large and the selection of questions to be answered is most important.

This analysis should be completed by September, 1968. Tentative plans call for additional follow-up studies in which additional data will be collected.

The Division of Educational Research published or assisted other divisions of the Department in publishing the following reports:

Facing Up—2—Statistical Data on Virginia's Public Schools

Virginia High School Dropouts—1966-67—Grades 8-12—Statistical Report

The Language Laboratory in Virginia—A Survey Report

1966-67 Scope of Offerings in Virginia High Schools

Function 2: To Encourage and Assist School Divisions in Designing and Conducting Pilot Studies.

The 1966 General Assembly appropriated \$75,000 for each year of the 1966-68 biennium to aid localities in these studies. The purpose of supporting pilot studies is to encourage local school divisions to define their educational problems and utilize new methods in solving these problems.

During the 1967-68 school year, 39 pilot studies were conducted in 18 county and eight city school divisions. Twenty of these studies were begun in the 1967-68 school year and 15 will be continued through 1968-69. All proposals for pilot studies are reviewed by the research staff of this division and by specialists in respective problem areas before receiving final approval. Proposals which are well-formulated and clearly defined and have potential Statewide value are approved for funding.

The yearly increase in the number of pilot study projects is indicative of the growing interest in educational research for use as an effective tool in solving problems which daily confront both teachers and administrators. More and more school divisions are initiating studies to create an awareness within their professional staffs of the need to implement new ideas and techniques in teaching today's youth. The pursuit of better answers to educational problems through experimentation and research in local systems throughout the State will accelerate the rate of improvement in the quality of public education in Virginia.

The Division of Educational Research and Statistics, in an attempt to aid local divisions in design and conduct of research studies, published *Pilot Study Program: Procedures* in March, 1968. This publication included the objectives of the program, the procedure for conducting a pilot study, a survey of services which the State Department offered to local school systems conducting a pilot study, and an indication of services expected from those participating in the pilot study program.

Pilot Studies in progress during 1967-68 were:

A Study to Determine the Effectiveness of First-Grade Teachers Moving Along with Their Pupils to the Second Grade (Accomack County)

Focus on Social Studies (Second Year of Study—Albemarle County)

Self-Selection of Reading Materials (Albemarle County)

A Pilot Study Designed to Develop and to Determine the Effects of Positive Interaction Among Teachers in Desegregated School Systems (Alexandria City)

A Study of Grouping Practices and Length of School Day in Kindergarten (Second Year of Study—Arlington County)

An Organizational Pattern Allowing for Prescriptive Teaching with the Utilization of Paraprofessionals (Arlington County)

Selected In-Service Experiences for Inexperienced Teachers (Second Year of Study—Arlington County)

A Program of In-Service Training for Mathematics Teachers New to the Arlington County Public Schools (Arlington County)

Selected In-Service Experiences for English Teachers New to the Arlington County Public Schools (Arlington County)

A Study Concerning Slow Learners in English, Grades Eight Through Twelve (Second Year of Study—Dinwiddie County, Fredericksburg City, Hanover County, Washington County, and Roanoke City)

A Functional Non-Graded English Program for Pupils with Below-Average Achievement (Second Year of Study—Fairfax County)

An Experimental Program to Develop Language Concepts (Second Year of Study—Fairfax County)

School-Within-A-School Inter-Discipline Program for Under-Achievers (Second Year of Study—Fairfax County)

An Experimental Evaluation of the Biological Sciences Curriculum Study (BSCS): Special Materials for Slow Learners (Second Year of Study—Fauquier County, Warren County, and Newport News City)

The Use of Programmed Audio-Visual Materials in the Classroom (Gloucester County)

A Study to Test Improvement of Listening Skills and Vocabulary of Fifth-Grade Students Through Individual and Small Group Use of Multi-Media Materials (Hampton City)

Development of Motor Skills in Mentally Retarded Children (Hampton City)

A Non-Graded Multi-Grouped English Program for Eleventh- and Twelfth-Grade Students (Second Year of Two- to Three-Year Study—Harrisonburg City)

A Two-Year Study to Develop and Evaluate Procedures and Materials Used in an Eighth-Grade Laboratory Science Program (Second Year—Harrisonburg City)

A Cooperative Team-Teaching Experiment Combining Remedial Mathematics and Remedial Reading Instruction for the Eighth-Grade Slow Learner (Henrico County)

An Evaluation of the Dual-Progress Classroom Organization and the Self-Contained Classroom Organization in Grades Four Through Seven (Second Year of Study—King George County)

Modern Mathematics—Grade One (Mecklenburg County)

An Investigation of an Instrument Designed to Predict Reading Failure of Pupils in Grade One (Newport News City)

The Effectiveness of Specially Selected Materials to Improve Mathematical Achievement of Pupils in Grade Four (Second Year of Study—Newport News City)

The Effectiveness of Transparencies for Improving Student Achievement and Retention of Basic Skills in a First-Year Drafting Course (Newport News City)

The Effects of Grouping Disadvantaged Children for Reading Instruction in Grade One (Second Year of Study—Newport News City)

The Use of Selected Materials, Based on Reading Level, to Improve Achievement of Slow Learners in a World History Course (Newport News City)

A Program for the Reluctant Learner with Emphasis on Reading (Prince William County)

Movement Patterns of Early Childhood (Richmond City)

The Use of School Office Aides in Public Schools (Second Year of Study—Richmond City)

A Study of Perceptual Training in the First Grade and Its Effect on Reading Achievement (Third Year of Study—Shenandoah County)

The Effects of Prescribed Lessons for Diagnosed Mathematics Weaknesses on Algebra I Achievement (Smyth County)

The Audio-Lingual Teaching of English to the Slow Eleventh-Grade Learner (Third Year of Study—Tazewell County)

The Development of a Block Curriculum Program in History and English and a Comparison with an ETV and Departmentalized Approach at the Seventh and Eighth Grade Levels (York County)

A Study of the Effectiveness of A Structured and Sequenced Program of Vocabulary Study in Improving Reading, Writing, and Listening Skills of High School English Students (Second Year of Study—Chesapeake City)

An Instructional Program of Cooperative Leadership Development for Potential Student Leaders (Fairfax County)

A New Approach to the Study of Government and English for Senior Students of Low Academic Achievement (Fairfax County)

Function 3: To Coordinate Educational Research in the State.

EXTENDED SCHOOL YEAR. As we have moved from an agrarian to an industrial economy, there has been a growing interest in an extended school year as a means of increasing the efficiency and quality of education programs.

A memorandum (Supts. Memo., No. 5216, December 15, 1967) was sent to all division superintendents to ascertain possible interest in research on different forms of an extended school year. A bibliography listing 103 references pertaining to the extended school year was appended to the memorandum. A majority of superintendents indicated an interest in discussion of the extended school year and 47 revealed interest in participating in pilot projects.

From these 47 divisions, 12 were selected on the basis of location and size to participate in a workshop planned for August, 1968. The workshop would be used to present different types of extended school year designs and examples of research concerning the implementation of these designs. A review of literature pertinent to the extended school year is being undertaken and is planned for distribution prior to the workshop in August.

PILOT STUDIES. Two separate studies coordinated by the Division of Educational Research and Statistics—*A Study Concerning Slow Learners in English, Grades 8-12* and *An Experimental Evaluation of Biological Sciences Curriculum Study (BSCS): Special Materials for Slow Learners*—were conducted by the divisions of: Dinwiddie County, Fredericksburg City, Hanover County, Washington County, and Roanoke County; and Fauquier County, Newport News City, and Warren County, respectively. These studies terminated in June, 1968. Analysis and evaluation will take place during the summer of 1968.

An analysis of two of the completed Pilot Studies was published during 1967-68. The titles and respective divisions were:

An Investigation of Selected Vision Screening Procedures. Arlington County Public Schools, June, 1968.

Science Enrichment for the Academically Talented. City of Virginia Beach Public Schools, June, 1968.

REGIONAL EDUCATIONAL LABORATORIES. Staff members of the Division of Educational Research and Statistics represent the Department in three regional educational laboratories. They are the Central Atlantic Regional Educational Laboratory (CAREL), the Appalachia Educational Laboratory (AEL), and the Regional Educational Laboratory for the Carolinas and Virginia (RELCV).

Function 4: To Provide a Two-Way Flow of Educational Data Between Local School Systems and the State Department of Education.

The need for educational information by the State Department of Education is entrenched in its objective of implementing the State educational program. The Division of Educational Research and Statistics was established within the Department to supply this information through machine data processing. When the source data have been collected, information can be made available quickly and in much greater quantity and depth for use on State and local levels through machine data processing. Such data are valuable for use in policymaking, in interpreting the educational program to the public, and as a basis for educational research.

Educational data are collected by the Department from the local school divisions through the fulfillment of regulatory obligations and through other service functions. Three prime goals of the Division of Educational Research and Statistics under Function Four are the reduction of duplicate requests for data, increased use and analysis of available information for decision making, and the increase of services to local school divisions with a minimum increase in their own work load.

In the development and analysis of an educational information system, the Division of Educational Research and Statistics centers its work around the five commonly recognized areas of educational information.

These are identified as property accounting, financial accounting, personnel accounting, pupil accounting, and instructional programs accounting. These five areas encompass the sources from which the overall system will produce information.

Each information area is a complement of the total system. Insofar as possible, it is necessary that each sub-system within the total system be capable of being integrated with any one or all of the other four sub-systems. For example, records of any individual teacher should include certificate information (personnel accounting), the grade or subjects he is teaching (instructional programs accounting), the school to which he is assigned (property accounting), the number of pupils he is teaching (pupil accounting), and financial information such as his salary (financial accounting).

Explicitly stated in Function Four is the responsibility of returning information to the local school divisions. This is also a prime consideration of any new system design. The information returned to the local divisions consists primarily of summaries and analyses of data that will be useful for decision making at the local level.

Specific accomplishments under Function Four are listed below:

1. The following applications were put into practice during the 1967-68 school year: School Identification System; Fall Enrollment Report; School Building Information Report; Annual Elementary School Report; Driver Education Status Report; Elementary Teacher Assignment System; Statistical Section of the Annual School Report; and Triennial School Census.
2. Research projects processed during the 1967-68 school year included: Survey of the June, 1967, Graduates, and Acceptable and Desirable Uses of the National Teacher Examinations and Other Teacher Behavior Measurements in Virginia.
3. Other applications already in operation were continued during the 1967-68 school year in the following general areas: State-Aid Accounting; Classroom Scheduling; Teacher Certification; Preliminary Annual High School Report; Pupil Attendance; Financial Accounting; Personnel Accounting; School Lunch and Milk Accounting; Property Accounting; Title I, PL-89-10 Accounting; General Educational Development Test Scoring.
4. The analysis of available information increased both as to quantity and the level of analytical methods applied. Dissemination of information in the form of summaries, analyses, and publications increased. Information was distributed to interested agencies at the local, State, and national levels, and to the general public.

Examples of these include:

Statistical Data on Virginia's Public Schools

Dropout Report

Fall Enrollment Report

Enrollment Projections 1967-1982

A 47 x 47 Variable Matrix Analysis of Instructional Personnel

A Tabulation of Results of the Survey of the June, 1967, Graduates

Directories of Teachers by Grade and/or Subject

DIVISION OF TEACHER EDUCATION

Purpose and Scope

The Division of Teacher Education is responsible for administering the programs for teacher certification, teaching scholarships, in-service education of teachers, scholarships for law enforcement officers, and for accreditation of colleges.* The following is a summary of the Division's responsibilities and activities during the 1967-68 fiscal year.

Certification of Teachers. Virginia statutes, like those in other states, require that legally employed teachers in the public schools hold certificates in accordance with "rules of certification" prescribed by the State Board of Education. The Division interprets standards, advises applicants and colleges concerning courses which may fulfill requirements for teachers, issues new certificates, and renews certificates. Reports of instructional personnel showing the certification status of each teacher are submitted by division superintendents and compared with certification data on file in the Division. After analysis, copies of approved reports are prepared for the permanent files of the State Board of Education and local school divisions.

State Teaching Scholarships. This program of scholarship aid, in maximum amounts of \$350 per school year, is available to residents of Virginia who are preparing to teach or who need to improve their qualifications to teach in Virginia public schools.

The scholarship aid which is in the form of loans, cancellable by teaching, may be used only in State-supported or private nonsectarian institutions of higher learning in Virginia.

In December, 1967, the State Board adopted the revised scholarship regulations affecting cancellation of promissory notes of scholarship recipients, and increased the rate of interest from 3 percent to 6 percent for notes issued on and after June 1, 1968.

During the 1967-68 school year, 5,363 Regular Term Scholarships were granted. In addition 688 Prorated Summer Quarter Scholarships were granted to prospective teachers who were seeking to secure a degree in less than four calendar years.

In-Service Education of Teachers. As a result of appropriations by the General Assembly, the State Board of Education has provided financial assistance to help teachers become more proficient in their teaching fields. These planned programs for the in-service education of teachers constitute an important part of the effort to improve the quality of public education in the State. During 1967-68 nearly 11,400 teachers were enrolled in: (1) specially designed extension courses offering college credit in their teaching subjects; (2) summer graduate courses offered at State colleges to give selected teachers the opportunity to keep up with developments in history, economics, government, English, foreign languages, guidance, mathematics, science, reading, or other subjects usually taught in the elementary schools; and (3) courses to qualify teachers to teach additional subjects in public schools.

*Effective July 1, 1968, this responsibility was transferred to the State Council of Higher Education.

Law Enforcement Scholarships. The General Assembly in 1966 appropriated \$25,000 for the 1968-70 biennium to be used for law enforcement scholarships, and assigned responsibility for the administration of the program to the State Board of Education. The act states:

"Any law enforcement officer of the State, or of any county, city or town thereof who attends any college which offers a degree or associate degree in Law Enforcement, may, upon application and acceptance in such college in an accredited course toward such degree, apply to the Department of Education for Virginia for reimbursement of the tuition paid for such course.' Upon such application, which shall be accompanied by evidence of the satisfactory completion of such course, the Council shall pay to such officer fifty per centum of the tuition cost of such course, not to exceed forty dollars for each such course. Upon receiving satisfactory evidence that such officer has continued to serve as a law enforcement officer for one year in Virginia following completion of such course, the Council shall pay to such officer the remaining fifty per centum of the cost of such tuition, not to exceed an additional amount of forty dollars for each such course."

As of June 30, 1968, expenditures for scholarships had accounted for nearly all funds available for the biennium. Participants from the following localities were reimbursed for law enforcement courses completed: Alexandria (15), Arlington (18), Chesapeake (4), Chesterfield (2), Fairfax (32), Fredericksburg (1), Hampton (26), Henrico (12), Herndon (1), Norfolk (25), Portsmouth (10), Richmond (118), Roanoke (18), Virginia Beach (3), Williamsburg (1), State Police (9).

Accreditation of Colleges. Section 23-9 of the Code of Virginia was amended and reenacted by the 1968 General Assembly of Virginia as follows:

"Conferring college degrees.—No *educational* institution in the State shall confer any college degree, whether academic, professional or honorary, unless and until such institution has been approved for such purpose by the State *Council of Higher Education*; *provided, that* the provision of this section shall not apply to the institutions of higher learning accredited by the State Board of Education for granting of college degrees prior to *July 1, 1968*, or *which have applications pending before the Board for such accreditation, prior to July 1, 1968, nor to any institution* specifically authorized by an act of the General Assembly. Any person, firm, association or corporation violating any of the provisions of this section shall be punished by a fine of not less than one hundred dollars nor more than one thousand dollars, and the granting of each degree in violation of this section shall constitute a separate offense."

In accordance with the provisions of the statute and State Board regulations in effect prior to July 1, 1968, the Division, under direction of the State Superintendent of Public Instruction, selected committees to visit those institutions of higher learning which had applied for State accreditation. Visiting committees prepared reports of their findings and recommendations for the Board with regard to accreditation of the applying colleges. Listed below are the colleges and the action taken by the Board with regard to the accreditation status of each.

<i>College</i>	<i>Date of State Board Meeting</i>	<i>Action</i>
Dabney Lancaster Community College, Clifton Forge	April 5, 1968	Granted initial accreditation for session 1967-68
Wytheville Community College, Wytheville	April 5, 1968	Granted initial accreditation for session 1967-68
Virginia Wesleyan College, Norfolk	May 3, 1968	Granted initial accreditation for session 1967-68*
Father Judge Mission Seminary, Monroe	June 7, 1968	Granted full accreditation effective session 1967-68
Virginia Western Community College, Roanoke	July 19, 1968	Granted full accreditation effective session 1967-68

*First and second year levels accredited for 1967-68 session. Plans senior college status 1969-70.

In response to an application from Stratford College, Danville, for accreditation as a four-year institution in 1969, and at the request of the college's president, a committee visited that institution in December, 1967, to make an informal report of its observations. The committee will return during 1968-69 to prepare for the State Board a formal report of its findings and recommendations regarding the institution's accreditation as a four-year college.

 Southern Seminary Junior College (Women).....Dr. Sidney E. Sandridge.....Buena Vista
 Stratford College* (Women).....Dr. W. Hugh Moomaw.....Danville
 Sullins College (Women).....Dr. William T. Martin.....Bristol
 Virginia Intermont College (Women).....Dr. Floyd V. Turner.....Bristol
 Virginia Seminary and College (Coed).....Dr. M. C. Southerland.....Lynchburg
 Virginia Wesleyan College† (Coed).....Lambuth M. Clarke.....Norfolk

*Will be a four-year college effective 1968-69.

†First and second year levels accredited for 1967-68 session. Will seek senior college status 1969-70.

OFFICE OF THE SPECIAL ASSISTANT FOR FEDERAL PROGRAMS

The Special Assistant for Federal Programs administers the Elementary and Secondary Education Act of 1965 (Public Law 89-10) and Public Laws 874 and 815.

The organization for the administration of Title I of P. L. 89-10 embraces a program director who is the principal administrator for Title I; a coordinator who is responsible for analyzing the educational soundness of applications for Title I projects and programs; four assistant supervisors with regional headquarters at Abingdon, Lynchburg, Warrenton, and Richmond, who assist in developing projects at the local level; an assistant supervisor whose principal responsibility is the evaluation of Title I projects; an educational grants advisor who reviews applications to make certain that they comply with the law, and with rules, regulations, and guidelines for administration of the program; an accountant; a key punch operator; and two secretaries.

The directors of the divisions in the State Department of Education aid the Special Assistant in the administration of Title V of P. L. 89-10. The Department's Division of Educational Research is the liaison agency for the Title IV programs, and the Library and Textbook Service is responsible for the detailed administration of Title II. A clerical person was employed during the year to assist with the Title II program. Title III of P. L. 89-10 was administered for the first time by the coordinator for that program. Title VI of P. L. 89-10 became operative during the year. This Title provides funds to assist with the education of handicapped children. The Division of Elementary and Special Education is responsible for its detailed administration. A State Plan was written for Part B-2 of the Education Professions Development Act. An appropriation has not been made for this Act which is designed to assist with the training of teachers and teacher aides. The Division of Teacher Education will be responsible for the detailed administration of this Act when it becomes operative. Public Laws 874 and 815 are administered by the Special Assistant for Federal Programs.

A brief summary of each of the operative programs follows:

TITLE I, P. L. 89-10

Title I provides funds for compensatory education for educationally disadvantaged children whose performance is not up to the level that is appropriate for their ages and grades. These children must be reached through "target schools"—schools in which the percentage of children from low-income families (family income of less than \$2,000 per year) exceeds the percentage for the county or city as a whole, or schools in which the number of children of low-income families is higher than the average number of such children per school in the county or city. Title I also provides funds for educational programs for children in State-supported schools for the handicapped, for children in State-supported institutions for the neglected and delinquent, and for the children of migrant agricultural workers.

Title I funds available to the State during 1967-68 totaled \$29,145,963 and included the following:

The allocation for children in low-income families for 196 projects	
in 121 school divisions.....	\$ 28,130,476

The allocation for children in State-supported schools for the handicapped.....	\$ 434,333
The allocation for State-supported schools for the neglected and delinquent.....	148,154
The allocation for grants to counties for the children of migrant agricultural workers.....	433,000

The areas of instruction that occurred with the greatest frequency were reading and language arts, cultural improvement, mathematics, pre-school programs, physical and health training, special education of the handicapped, and music and art.

Comprehensive evaluation reports from local school divisions indicate that substantial progress was made with Title I projects throughout the State.

TITLE II, P. L. 89-10

Title II provides funds for textbooks, library books, audio-visual aids, and other instructional materials. One dollar and ninety-three cents per pupil in average daily attendance (1966-67) in the public schools, plus the same amount per pupil in average daily attendance in the eligible private schools, was made available to the public schools for the purchase of library books and other instructional materials. This allocation was based on locally taxable wealth per pupil, books per pupil, and local expenditures per pupil for library resources.

The Title II State Plan was changed to give local school divisions greater latitude and responsibility for the selection of library materials. The modified State Plan also made provisions for the allocations of funds for the establishment of demonstration libraries.

Title II funds also may be used to purchase library resources for schools operated by State agencies that provide instruction at the elementary and secondary school levels. During 1967-68, seven schools operated by State agencies received allocations totaling \$3,257.84. Pupils enrolled in eligible private schools may borrow library materials purchased with Title II funds. During the school year, 37,491 pupils enrolled in 113 private schools availed themselves of this opportunity. These private schools are located in 28 school divisions. Virginia's total authorization for Title II funds during the year amounted to \$2,076,258, of which \$1,823,821.62 was allocated for 264 projects in eligible schools. Nine demonstration libraries were established with an allotment of \$199,998.

TITLE III, P. L. 89-10

Title III of P. L. 89-10 provides federal funds to localities for the purposes of developing exemplary or demonstration educational programs and establishing educational service centers. Local education agencies must submit project applications which are considered on a competitive basis by the U. S. Office of Education. Cooperative planning by groups of local education agencies and participation of civic and cultural groups within the community are encouraged. During the 1967-68 school year, 25 regular programs and 19 small (under \$25,000) grants were operative; 36 applications were submitted of which 18 were approved for funding and implementation in the 1968-69 school year. Over 50 divisions with approximately 65 percent of the State's average daily attendance partici-

pated in Title III programs. Project activities included: kindergarten education; summer "catch-up" and enrichment; in-service education and curriculum development; diagnostic and corrective services for children with educationally handicapping conditions; reading skills development centers; fine and performing arts. Virginia's allocation for fiscal year 1967-68 was \$4,100,000, all of which was committed to project activities.

TITLE IV, P. L. 89-10

To some extent Title IV, which places major emphasis on the establishment of regional educational centers, is a revision of the 1954 Cooperative Research Act. The State Department of Education is affiliated with three regional research laboratories for which operational funds have been provided. They are: Appalachia Educational Laboratory, Inc., Charleston, West Virginia; Central Atlantic Regional Educational Laboratory, Washington, D. C., and the Regional Educational Laboratory for the Carolinas and Virginia, Durham, North Carolina.

TITLE V, P. L. 89-10

Title V provides funds for strengthening state departments of education. Under the program applications were approved for 49 professional and clerical positions, providing consultants for Department seminars and workshops, and purchasing educational and office equipment. Project applications totaling \$446,254 in Title V funds were approved by the U. S. Office of Education for the fiscal year. As of June 30, \$312,027.73 had been spent by the State Department of Education.

TITLE VI, P. L. 89-10

Virginia's allocation under this Title was \$304,744. With the exception of \$16,836.18 which was used for administration, the balance of these funds was expended in providing training opportunities for teachers in special education fields. Spring extension classes, summer extension classes, institutes, summer session traineeships, and other teacher training opportunities were provided.

PUBLIC LAW 874

Public Law 874, enacted originally in 1950, provides funds for the operation of schools in counties and cities in federally impacted areas. To be eligible to receive these funds, the federally connected pupils in a local school district must represent a minimum of three percent of the total average daily attendance for the district, or 400 pupils. Funds are sent directly to the treasurers of the local school districts, and are not distributed through the State Treasury. Fifty-four counties, cities, and towns in Virginia received \$22,151,784 during 1967-68 under this law.

PUBLIC LAW 815

Enacted originally in 1950, Public Law 815 provides funds for school building construction in federally impacted areas. Administrative practices for this legislation are similar to those for P. L. 874, but additional emphasis is placed on a rapid increase in the number of federally connected pupils. Six counties and cities in Virginia received \$1,028,158.13 under this law during 1967-68.
